MANZANILLO OLIVE The most popular table olive in CA., Manzanillo is a large, round freestone with a high flesh to pit ratio. As the Spanish Manzanillo olive ripens, the flavor becomes fruitier and less bitter, but the water content increases making it better suited to curing than extracting. The Manzanillo tree is moderately vigorous with a spreading growth habit and medium density. Though partially self-fertile, yields will increase when Manzanillo is pollinized by Sevillano or Ascolano. This variety is moderately cold hardy.

PICUAL OLIVE The Picual olive comes from Spain. Newer plantings in Chile, Australia and New Zealand are proving the value of this highly productive, early variety. Picual is easy to harvest and contains a high content of easily separated oil with pungent flavor that stores well. In Spain, Picual is a popular table olive known to be high in beneficial chemicals such as oleic acid and Vitamin E. The Picual olive is cold hardy and self-fertile, but produces higher yields when paired with a pollinizer such as Manzanillo.
