PANACHE 'TIGER' FIG Especially fine flavor! Small to medium sized fruit with green color and yellow “Tiger” stripes. Strawberry pulp is blood-red in color. 100 hours. Self-fruitful

MISTY BLUEBERRY Southern Highbush. Early, in the West Misty is quite vigorous, growing very well both on the coast and in the inland heat. This excellent flavored fruit does well in areas with chilling as lows as 150 hours and all areas with mild winters and hot summers.

SHARPBLUE BLUEBERRY Southern Highbush. Excellent flavor. Nearly evergreen in mild winter climates. Bares fruit nearly year-round. Vigorous plant to 6 ft. Dime-sized dark blue fruit. 200 hours.

SUNSHINE BLUE BLUEBERRY Southern Highbush cultivar. Great flavored firm berries. Ripens May 10 through June 15 at Gainesville, Florida. A semi dwarf evergreen bush with great fall color. Showy hot pink flowers fade to white in spring. Self-fruitful. Estimated chilling hours needed 150 hours, but very cold hardy as well.
