Prized for its mild oil, the Arbequina olive is small and yields a very aromatic and fruity flavor that is low in bitterness. The tree is fairly disease-resistant and pest-tolerant. Arbequina is self-fertile, but produces higher yields when planted with a pollinizer such as Koroneiki or Arbosana.

The Arbosana flavor is a Complex mixture of fruitiness with a good balance of pungency and bitterness. The late-bearing Arbosana variety is fairly cold hardy though not as hardy as Arbequina.
