**ARBEQUINA AS1® OLIVE** Commercially planted in super high density orchards, the low-vigor Arbequina olive tree bears fruit earlier than Traditional varieties. When planted in a wider spacing, this variety will exhibit a spreading, somewhat weeping canopy and grow to a medium size. Prized for its mild oil, the Arbequina olive is small and yields a very aromatic and fruity flavor that is low in bitterness. The tree is fairly disease-resistant and pest-tolerant. Arbequina is self-fertile, but produces higher yields when planted with a pollinizer such as Koroneiki or Arbosana.

**ARBOSANA L43® OLIVE** The dwarf Arbosana tree produces large crops of smallolives with high concentrations of premium olive oil. The Arbosana flavor is a Complex mixture of fruitiness with a good balance of pungency and bitterness. The late-bearing Arbosana variety is fairly cold hardy though not as hardy as Arbequina. Like Arbequina, Arbosana is self-fertile, but produces higher yields when paired with a pollinizer such as Arbequina or Koroneiki.

**ARCTIC SUPREME WHITE PEACH** Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central CA. 700 hours. Self-fruitful. (Zaiger)

Kaweah has a delicious true peach flavor with a good balance of sugar to acid and is an all purpose fruit, good for fresh eating, baking, canning, jams and jellies. Recent low-chill trials have shown Kaweah to be productive with less than 500 chill hours. (Plant Pat. No. # 10177).

**BELLA GOLD PEACOTUM®** A new fruit type from Zaiger Hybrids. Peach x apricot x plum. Slightly fuzzy skin, like that of an apricot, is bright yellow with an attractive red blush.
