FUJI APPLE Introduction from Japan that quickly became CA's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6 - 9

RED FUJI APPLE (BC#2) Redder skinned bud sport of Fuji. Sweet, very crisp and flavorful, excellent keeper. Ripe September October in Central CA. Excellent pollinizer for other apple varieties. Self-fruitful. USDA Zones 5 - 9

HOSUI ASIAN PEAR Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-August in Central CA. 300-400 hours. Pollenized by Shinko, Chojuro, Bartlett, or 20th Century.

ICHIBAN NASHI ASIAN PEAR The earliest-ripening Asian pear. Medium sized fruit with a light golden brown russet skin. Crisp, crunchy flesh is sweet, with especially fine flavor. Harvest mid to late July in Central CA. Keeps six weeks. Productive, moderately vigorous tree. 400 hours. Pollinizer required.

ISHIIWASE ASIAN PEAR Large, greenish-brown, russeted skin. Juicy, sweet, flavorful, refreshing, crisp like an apple when ripe. Early to mid August in Central CA. 450 hours. Pollenized by Kikusui, 20th Century, or other Asian pear.

KIKUSUI ASIAN PEAR Juicy, sweet, yellow-skinned fruit - crisp like an apple when ripe. Superb fresh eating, one of the best. Easy to grow. Keeps well. Mid-August in Central CA. 450 hours. Partly self-fruitful or pollenized by Ishiiwase or 20th Century.

SEIGYOKU ASIAN PEAR Large fruit, smooth yellow skin. Very best quality - crisp, juicy, sweet, flavorful. Blooms later than Shinseiki and 20th Century. Ripe a few days before 20th Century. 500 hours. Partly self-fruitful or plant with Kikusui, 20th Century, or Bartlett.

SHINKO ASIAN PEAR Late ripening -September in Central CA- and excellent quality. Juicy, sweet, flavorful, refreshing, crisp like an apple. Golden brown russeted skin. 450 hours. Pollenized by Hosui, Chojuro, Kikusui, Bartlett

HOLLYWOOD PLUM Fruiting ornamental. Introduced commercially in 1936. Very delicious fruit is medium sized, round and has blood red flesh and skin. Ripens late June. Hangs well on the tree. Good for jelly and canning. Red leaved tree has upright growth habit. 300-400 hours. Self-fruitful. USDA Zones 5-9.

BONGO FLOWERING APRICOT (Prunus ume 'Bongo'). Flowering apricot, large fruit to 2", pinkish white flowers.

MOKEL FLOWERING APRICOT (Prunus ume) Spectacular early pink blooms, 1" to 1 1/4" fruit. Sometimes used for pickling.
