## Dave Wilson Nursery varieties for 2019:

**Anna Apple** Remarkable fruit for mild winter climates in So. Calif., So. Ariz. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. Keeps 2 months in refrigerator. 200 hours. Self-fruitful or pollenized by Dorsett Golden or Einshemer. USDA Zones 5-10.

**Dorsett Golden Apple** Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Productive throughout So. CA and Phoenix, AZ. Good early season sweet apple for Central CA. 100 hours. Self-fruitful. USDA Zones 5-10.

**Fuji Apple** Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

**Gala Apple** Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollinizer for other varieties. Adapted to cold- and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4-10.

**Ghost Apple** For the apple lover seeking a truly unique variety, the Ghost apple is in a category by itself. Completely white skin and flesh with sweet, sub-acid flavor, a taste pleaser at several fruit tastings. Does well in hot climates. Harvest in early July in central California. Pollenized by any mid-season blooming apple. 300-400 chill hours, high-chill adaptable. USPP applied for. (Zaiger)

**Granny Smith Apple** From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6-9.

**Multi-Bud Apple, Espaliered 3-tier, Braeb-Fuji-Gala-Gldn Del-Grav-Red Del 6n1** Six apple varieties on one 3-tier espaliered tree: Braeburn, Fuji, Gala, Golden Delicious, Gravenstein and Red Delicious.

**Pink Lady® Apple** Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in

Central CA, about three weeks after Fuji. Self-fruitful. 300-400 hours. USDA Zones 6-9.

**Blenheim (Royal) Apricot** All-purpose freestone. Sweet, aromatic, flavorful - the long-time No. 1 apricot in California. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7-8.

**Earli-Autumn Apricot** Wonderful flavor as tested by Dave Wilson Nursery both fresh and dried. Will please even the most critical of apricot lovers. Late harvest, first two weeks of August. 500 hours or less. Self-fruitful. (Pat. No. 9937). USDA Zones 7-9. (Zaiger)

**Pixie-Cot Genetic Semi-dwarf Apricot** Compact tree with medium-sized, fine quality fruit. First genetically dwarfed apricot to meet the flavor standards set by Dave Wilson Nursery for release to the home gardener. Ripens first week of June in CA's Central Valley. 500 hours. Patent pending. (Zaiger)

**Cot-N-Candy White Aprium® Interspecific Apricot** Wonderful new fruit from Zaiger Hybrids. White flesh apricot-plum hybrid. Medium-sized with incredible flavor, very sweet and juicy. Ripens early- to mid-July. Self-fruitful. 400 hours or less. USDA Zones 7-10. (Pat. No. 17827) (Zaiger)

**Flavor Delight Aprium® Interspecific Apricot** Apricot-plum hybrid. Resembles an apricot but with a distinctive flavor and texture all its own. High taste-test scores, one of the most flavorful early season fruits. Early June. Very low chilling requirement, less than 300 hours. Self-fruitful, but largest crops when pollenized by another apricot. (Zaiger)

**20th Century Asian Pear** Juicy, sweet, mild flavored fruit is crisp like an apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollenized. by Shinseiki, Bartlett, or other.

**Lapins Cherry** Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

**Minnie Royal Cherry** Medium-sized red cherry, firm with good flavor. Ripens 11-14 days ahead of Bing, tree is very productive with a low chill requirement. Pollenized by Royal Lee. 200-300 hours or less. (Pat. No. 12942) (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Royal Crimson Cherry** The long-awaited low-chill self-fruitful sweet cherry from Zaiger Genetics, Royal Crimson is a consistent producer of large, tasty, crimson-red fruit. Harvest is early to mid May. This important new variety is also an excellent pollenizer for Minnie Royal and Royal Lee. Estimated chill requirement 200-300 hours. Patent applied for. (Zaiger)

**Royal Lee Cherry** Medium-sized red cherry, very firm with excellent flavor. Ripens 11-14 days ahead of Bing, Very low chilling requirement, excellent pollenizer for Minnie Royal. Pollenized by Minnie Royal. 200 to 300 hours. (Pat. No.12417) (Zaiger)

**Black Jack Fig** Large, purplish-brown figs with sweet, juicy, strawberry-red flesh. Harvest August to October in Central CA. Naturally small (semi-dwarf) tree. 100 hours. Self-fruitful. USDA Zones 7-10.

**Black Mission Fig** The industry standard. Purplish-black skin, strawberry-colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Two crops per year. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

**Improved Brown Turkey Fig** Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted - coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful. USDA Zones 7-9.

**Kadota Fig** Large, light greenish-yellow 'white' skin, amber flesh. Long-lived, vigorous. Prune to any shape. Very sweet fruit needs hot weather to ripen. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

**Multi-Bud Fruit Salad, JulElb-Fantasia-Babcock-SRosa-Blenh** July Elberta Peach, Fantasia Nectarine, Babcock White Peach, Santa Rosa Plum and Blenheim Apricot budded onto Nemaguard rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

**Multi-Bud Miniature, Necta Zee Nect.-Honey Babe Peach** Pick delicious nectarines and peaches from this 2n1 miniature fruit tree. Spreading growth, reaches 5-6 ft. in height.

**Spice Zee NectaPlum® Interspecific Nectarine** The first NectaPlum® from Zaiger Genetics: a white-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable. Tree is quite ornamental. Tremendous purplish pink bloom in the spring, followed by a flourish of red leaves which mature into lush green in late summer. Self-fruitful. Very productive. 200-300 hours. High chill adaptable. (Pat. No. 13503) (Zaiger)

**Arctic Jay White Nectarine** Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of acid and sugar. Ripens between Arctic Glo and Heavenly White white nectarines. 500 hours or less. Self-fruitful. (Pat. No. 9908) (Zaiger)

**Double Delight Nectarine** Sensational fruit: consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red-skinned, freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

**Necta Zee Miniature Nectarine** Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less. Self-fruitful. (Zaiger)

**Arctic Babe Miniature Interspecific Nectarine** A result of innovative interspecific breeding by Zaiger Genetics, Arctic Babe is the first white-fleshed miniature nectarine. Super-sweet, large size fruit ripens early: late May to early June in central California. Reaching only 4-6 ft., this tree is easy to thin and harvest, easy to cover to protect blooms from frost. Chilling requirement not yet established, expected to be less than 700 hours. Self-fruitful. (Introduced for the 2017-18 season as 243BC331 Miniature Interspecific Nectarine)

**August Pride Peach** Large, all-purpose yellow freestone for mild-winter climates. Sweet, aromatic, rich flavor, one of the very best. Ripens 3-4 weeks after Mid-Pride. Chilling requirement less than 300 hours. Self-fruitful. (Zaiger)

**Babcock White Peach** Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. High scoring in taste tests. Ripens mid-July in Central CA. Widely adapted (low chill requirement, yet not early blooming). 250-300 hours. Self-fruitful.

**Donut (Stark Saturn) White Peach** Unique white-fleshed fruit with a sunken center (shaped like a doughnut). Sweet, with a mild flavor described by some as almond-like. Ripens late June/early July in Central CA. Estimated chilling requirement 200-300 hours. Self-fruitful.

**Honey Babe Miniature Peach** Sweet, yellow freestone, rich peach flavor. Heavy bearing 5 ft. tree. Early to mid-July in Central California. Excellent choice for home orchard. 400 hours or less. Partly self-fruitful, sometimes shy-bearing without a pollenizer. (Zaiger)

**July (Kim) Elberta Peach** Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400-500 hours. Self-fruitful.

**May Pride Peach** Very early peach for warm winter climates. Ripens in May, about with Desert Gold. Delicious, sweet and tangy, semi-freestone when fully ripe. Very large for such an early peach. Large, showy pink blossoms. 150-200 hours. Self-fruitful. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Mid-Pride Peach** Best yellow freestone for warm winter climates of So. Calif., Phoenix, Houston, S.F. Bay Area. Also recommended for Central CA for its exceptional flavor and dessert quality. Midseason. 250 hours. Self-fruitful. (Zaiger)

**Pix Zee Miniature Peach** Large fruit ripens mid to late June in Central CA, two weeks before Honey Babe. Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. 400 hours or less. Self-fruitful. (Zaiger)

**Red Baron Peach** Flowering/fruiting. Large, juicy, firm, richly flavored yellow freestone fruit. Highly rated in taste tests. Showy double red blossoms. Mid-July. Long-time favorite in Southern CA and Texas. Low chilling requirement, 250-300 hours. Self-fruitful.

**Bartlett Pear** World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollinated by Bosc, D'Anjou, Winter Nelis.

**Fuyu (Jiro) Persimmon** Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

**Giant Fuyu Persimmon** Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful.

**Hachiya Persimmon** Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. 200 hours. Self-fruitful.

**Sweet Treat Pluerry™ Interspecific Plum** Sweet Treat is the first of its kind, the Pluerry™: a new fruit type from the genius of Floyd Zaiger. This taste-test favorite is a complex interspecific hybrid, predominantly of plum and cherry, combining the sweetness of a cherry with that summer fresh plum zing. Much larger than a cherry, this precocious and prolific variety will hang on the tree for over a month, and the colorful fruit make Sweet Treat a true ornamental. Tested as 46MB583. Harvest late June through July. Estimated chilling requirement 450 hours. Pollenizer required: Burgundy or Santa Rosa plum, or Flavor King Pluot® recommended. Patent Pending (Zaiger)

**Burgundy Plum** Maroon colored skin and semi-freestone flesh. Sweet, with little or no tartness and a very pleasing, mild flavor. High taste test scores. Prolonged harvest, mid-July to mid-August in Central CA. Very productive tree with narrow, upright habit. 300 hours. Self-fruitful.

**Golden Nectar Plum** Popular yellow dessert plum. Large, oblong fruit with waxy, thin, amber skin. Amber flesh is firm, sweet and flavorful. Very small pit. August harvest in Central CA. 400 hours or less. Self-fruitful.

**Santa Rosa Plum** Most popular plum in California & Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

**Satsuma Plum** Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollinated by Santa Rosa or Beauty.

**Weeping Santa Rosa Semi-Dwarf Plum** One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit: long slender limbs bow gracefully to the ground. Easily espaliered. 200-400 hours. Self-fruitful.

**Dapple Dandy Pluot® Interspecific Plum** Taste test winner. Ranks with Flavor King Pluot® among the all-time top five best flavored fruits at Dave Wilson Nursery tastings. Creamy white and red fleshed freestone with wonderful plum-apricot flavor. Skin greenish-yellow with red spots, turning to a maroon and yellow dapple. August harvest in Central CA. 400-500 hours. Pollinated by Flavor Supreme Pluot®, Flavor King Pluot®, Santa Rosa, Catalina or Burgundy Plum. (Pat. No. 9254) (Zaiger)

**Flavor King Pluot® Interspecific Plum** Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central CA. Naturally small tree. 400 hours or less. Pollinated by Flavor Supreme Pluot® or Dapple Dandy Pluot® and Santa Rosa or Late Santa Rosa plum. (Zaiger)

**Flavor Supreme Pluot® Interspecific Plum** Taste test winner. Plum/apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central CA, about two weeks before Santa Rosa. 700-800 hours. Pollinated by Santa Rosa and Late Santa Rosa plums, or Flavorosa, Flavor Queen and Geo Pride Pluot®. (Zaiger)

**Eversweet Pomegranate** Very sweet, virtually seedless fruit. (Even immature fruits are sweet.) Red skin, clear (non-staining) juice. Harvest late summer through fall. Coast or inland. 8-10 ft. arching shrub, or train as tree or espalier. Large, showy, orange-red flowers. 150 hours. Self fruitful.

**Jewel Southern Highbush Blueberry** One of California's leading commercial varieties due to its high adaptability. Exceptional growth and high yields. Midseason harvest of large to very large berries with tangy sweet flavor. Chill requirement estimated at 200 hours. Self-fruitful, zones 7-10. (U.S Plant Patent #11807)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Sunshine Blue Southern Highbush**

**Blueberry** Southern highbush. Great flavored firm berries. Ripens May 10 through June 15 at Gainesville, Florida. Semi-dwarf evergreen bush with great fall color. Showy hot pink flowers fade to white in spring. Self-fruitful. Estimated chilling required 150 hours, but very cold hardy as well.

**Baba Red Raspberry** Everbearing Red Raspberry - Extra large berries up to 1 1/2" long. Wonderful warm weather variety particularly well suited to southern California's coastal and inland valleys. Fine flavor and good for all uses. Bears heavy crop May-July with a smaller late summer crop through fall. Hardy to zero degrees. Self-fruitful. Best in zones 4-11.

**Boysenberry Thornless** Rubus ursinus var. loganobaccus, a hybrid of blackberry, raspberry, dewberry and loganberry. Very large berry up to 2.5", dark maroon in color with an intense, tangy, sweet flavor. Excellent quality with few seeds and a pleasant aroma. Vine-like trailing growth habit. Harvest through summer. Self-fruitful, best in zones 5-10.

**Heritage Raspberry** Everbearing - Large, sweet, dark red berries. Mild flavor and excellent quality. Good for all uses. Moderate early crop in June, July. Heavier late crop August through fall. Berries keep well on or off the vine. Upright growth habit. Self-fruitful. Best in Zones 4-11.

**Marion Blackberry** Medium to large size firm, sweet, bright berries. Excellent for fresh and dessert use. Rated by many as the best pie berry. Long harvest June through summer. Cross of Olallieberry developed in Oregon where it is a major commercial variety. Very long, vine-like canes require support. Self-fruitful. Best in zones 6 - 9

**Olallieberry** A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.

**Black Monukka Seedless Grape** Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Use fresh or for raisins. Early midseason. 100 hours. Self-fruitful. Cane or spur prune.

**Crimson Seedless Grape** Newer late season seedless grape, ripens early October in Fresno, CA. Medium size, firm, very sweet, excellent quality. Cane prune. 100 hours. Self-fruitful.

**Princess Seedless Grape** Large, white, mid season. Fruit stores well and hangs on the vine for an extended period. Best for fresh eating and raisins. Cane prune. Ripens mid to late August after Thompson Seedless. Hardy to Zone 7.

**Thompson Seedless Grape** Most popular grape in CA, AZ. Fresh and raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful. Cane prune.

**Tomuri Male Kiwi** Actinidia chinensis, aka A. deliciosa. Pollenizer for Vincent female. Does not bear fruit. One male can pollinize up to eight Vincent females.

**Vincent Female Kiwi** Actinidia chinensis, aka A. deliciosa. Low chilling requirement, adapted to Southern CA. Tasty, well-regarded fuzzy-skinned fruit. Pollenized by Tomuri Male.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.
