Dave Wilson Nursery varieties for 2019:

Anna Apple Remarkable fruit for mild winter climates in So. Calif., So. Ariz. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. Keeps 2 months in refrigerator. 200 hours. Self-fruitful or pollinated by Dorsett Golden or Einshemer. USDA Zones 5-10.

Arkansas Black Spur Apple Large, late season. Dark red skin, high quality even where summer nights are warm. For dessert and cooking. Keeps many months. Chilling requirement 500-600 hours. Partly self-fruitful. USDA Zones 5-9.

Espaliered Apple, Fuji, 3-tier

Espaliered Apple, Gala, 3-tier

Fuji Apple Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

Gala Apple Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollinizer for other varieties. Adapted to cold- and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4-10.

Ghost Apple For the apple lover seeking a truly unique variety, the Ghost apple is in a category by itself. Completely white skin and flesh with sweet, sub-acid flavor, a taste pleaser at several fruit tastings. Does well in hot climates. Harvest in early July in central California. Pollinated by any mid-season blooming apple. 300-400 chill hours, high-chill adaptable. USPP applied for. (Zaiger)

Golden Delicious Apple Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Midseason harvest (September in Central CA). 700 hours. Self-fruitful. USDA Zones 5-10.

Granny Smith Apple From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6-9.

Honeycrisp Apple Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens mid-August. Pollinated by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3-8.

Multi-Bud Apple, Espaliered 3-tier, Braeb-Fuji-Gala-Gldn Del-Grav-Red Del 6n1 Six apple varieties on one 3-tier espaliered tree: Braeburn, Fuji, Gala, Golden Delicious, Gravenstein and Red Delicious.

Multi-Bud Apple, Espaliered 3-tier, Northwest Varieties 6n1 Six northwest apple varieties selected for home growing.

Multi-Bud Apple, Fuji-Gala-Golden Delicious-Granny Smith Fuji, Gala, Golden Delicious and Granny Smith budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Apple, Fuji-Gala-Golden Delicious-Red Delicious Fuji, Gala, Golden Delicious and Red Delicious budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Apple, Fuji-Gala-Mutsu-Jonagold Fuji, Gala, Mutsu and Jonagold budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Pink Lady® Apple Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 300-400 hours. USDA Zones 6-9.

Pink Pearl Apple Unusual pink fleshed, highly aromatic fruit. Medium-sized, cream and pale green skin, sometimes blushed red. Tart to sweet-tart, depending on time of picking. Early fall harvest. Good keeper. Makes colorful, tasty applesauce. Early, profuse, pink blossoms in spring. 600 hours. Pollinizer required. USDA Zones 4-8.

Red Delicious (Harrold) Apple Early fall fruit is sweet, crisp and fine flavored. Vigorous, productive tree. Good pollinizer for almost all other apples. 700 hours. Pollinated by Fuji, Gala, Granny Smith, or Golden Delicious. USDA Zones 5-8.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Red Fuji Apple Redder skinned bud sport of Fuji. Sweet, very crisp and flavorful, excellent keeper. Ripe September-October in Central CA. Excellent pollinizer for other apple varieties. Self-fruitful. USDA Zones 5-9.

Sierra Beauty Apple Favorite late apple in Northern California. Yellow with red blush, rich sprightly flavor, moderately sweet. Excellent fresh or cooked. Good keeper. 700-800 hours. Self-fruitful. USDA Zones 6-9.

Yellow Newton Pippin Apple Yellow green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest until cheeks are blushed yellowish-green (late Oct./early Nov. in Central CA). Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. 700 hours. Self-fruitful. USDA Zones 5-8.

Autumn Glo Apricot Late season apricot with tremendous flavor. Ripens in the first two weeks of August. Fruit is medium-sized with good color. One of the highest scoring apricot varieties to date at Dave Wilson Nursery fruit tastings. 500 hours or less. Self-fruitful. USDA Zones 7-9. (Zaiger)

Blenheim (Royal) Apricot All-purpose freestone. Sweet, aromatic, flavorful - the long-time No. 1 apricot in California. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7-8.

Brittany Gold Apricot This sweet apricot is a very consistent producer in the Dave Wilson test orchard, and has proven to perform in tough climates where no other apricots do. This large, firm fruit has an extremely long season for an apricot, hanging for two weeks or more at the end of July. Self-fruitful. Estimated chilling requirement 500-700 hours. U.S. Plant Pat. No. 13504 (Zaiger)

Gold Kist Apricot Excellent backyard apricot for warm winter climates. Freestone, very good quality. Heavy bearing. Early harvest, 3-4 weeks before Blenheim (Royal). 300 hours. Self-fruitful. USDA Zones 7-9. (Zaiger)

Katy Apricot Large, all-purpose, flavorful freestone. Tree ripe fruit is subacid (not tart). A favorite apricot for warm-winter climates. Early harvest, 3-4 weeks before Blenheim (Royal). 200 to 300 hours. Self-fruitful. USDA Zones 7-9. (Zaiger)

Moorpark Apricot Long-time favorite of apricot fanciers for its exceptionally rich flavor and aroma. Reliable producer. Used fresh and for canning. 600 hours. Self-fruitful. USDA Zones 6-9.

Multi-Bud Apricot, Tomcot-Katy-Blenh-Flvr Delight-Ryl Rosa Tomcot, Katy, Blenheim, Flavor Delight Aprium? and Royal Rosa budded onto Citation rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Pixie-Cot Genetic Semi-dwarf Apricot Compact tree with medium-sized, fine quality fruit. First genetically dwarfed apricot to meet the flavor standards set by Dave Wilson Nursery for release to the home gardener. Ripens first week of June in CA's Central Valley. 500 hours. Patent pending. (Zaiger)

Royal Apricot All-purpose freestone. Sweet, aromatic, flavorful - the long-time No.1 apricot in California. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7-8.

Royal Rosa Apricot Extremely vigorous - more disease tolerant than other apricots. Bears young and heavy. Especially nice fruit: sweet, low acid, fine flavor. Very early harvest (late May in Central CA). Excellent backyard apricot. 500 hours. Self-fruitful. USDA Zones 7-9. (Zaiger)

Tropic Gold Apricot Reliable producer of medium-large yellow fruit with orange-red blush and exceptional flavor. Ripens late June. Discovered at Camarillo, CA. Low-chill, 350 hours or less. Self-fertile. USDA Zones 7-9.

Cot-N-Candy White Aprium® Interspecific Apricot Wonderful new fruit from Zaiger Hybrids. White flesh apricot-plum hybrid. Medium-sized with incredible flavor, very sweet and juicy. Ripens early- to mid-July. Self-fruitful. 400 hours or less. USDA Zones 7-10. (Pat. No. 17827) (Zaiger)

Flavor Delight Aprium® Interspecific Apricot Apricot-plum hybrid. Resembles an apricot but with a distinctive flavor and texture all its own. High taste-test scores, one of the most flavorful early season fruits. Early June. Very low chilling requirement, less than 300 hours. Self-fruitful, but largest crops when pollinized by another apricot. (Zaiger)

Leah Cot Aprium® Interspecific Apricot Large size Aprium® with deep orange color inside and out. Reliable annual bearer, high flavor and firm texture, ripens mid to late June in Central California, just after Flavor Delight Aprium®. Self-fruitful, required chill 500 hours or less, best in zones 7-10. U.S. Plant Patent No. 21863 (Zaiger)

Summer Delight Aprium® Interspecific Apricot New introduction for 2016. This late-season Aprium® is a reliable bearer with very juicy flesh and great apricot flavor. Ripens late July-early August at Hickman, California. Self-fruitful, chilling requirement 500 hours or less. Best in zones 7-10. U.S. Plant patent pending (Zaiger)

20th Century Asian Pear Juicy, sweet, mild flavored fruit is crisp like an apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollinized. by Shinseiki, Bartlett, or other.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Hosui Asian Pear Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-August in Central CA. 300-400 hours. Pollenized by Shinko, Chojuro, Bartlett, or 20th Century.

Kikusui Asian Pear Juicy, sweet, yellow-skinned fruit - crisp like an apple when ripe. Superb fresh eating, one of the best. Easy to grow. Keeps well. Mid-August in Central CA. 450 hours. Partly self-fruitful or pollenized by Ishiiwase or 20th Century.

Shinko Asian Pear Late ripening - September in Central CA - and excellent quality. Juicy, sweet, flavorful, refreshing, crisp like an apple. Golden brown russeted skin. 450 hours. Pollenized by Hosui, Chojuro, Kikusui, Bartlett

Shinseiki Asian Pear Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August in Central CA. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 250-300 hours. Self-fruitful.

Bing Cherry Large, firm, juicy, sweet, nearly black when ripe. Superb flavor, the No. 1 cherry. Midseason. Large vigorous tree. Pollenized by Black Tart, Van, Rainier and Lapins. Also Stella in colder climates. 700 hours. USDA Zones 5-9.

Black Tartarian Cherry Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries. USDA Zones 5-7.

Compact Stella Cherry Compact growth habit, semi-dwarf to 12 ft. Large, dark red, tasty fruit ripens late May and early June. Self-fruitful. 500-800 hours. USDA Zones 4-9.

Craig's Crimson Cherry Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Harvest begins early. 500-600 hours. USDA Zones 5-9. (Zaiger)

English Morello Sour Cherry Late-ripening tart cherry for cooking, sometimes eaten fresh when fully ripe. Dark red to nearly black fruit with dark juice. Small, round-headed tree with drooping branches (easy to harvest). European origins obscure, introduced to America prior to 1862. 500 hours or less. Self-fruitful. USDA Zones 4-9.

Lapins Cherry Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

Montmorency Sour Cherry Large, light red skin, yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy. Very heavy bearing. 500 hours. Self-fruitful. USDA Zones 4-9.

Multi-Bud Cherry, Black Tartarian-Bing-Lapins-Van Black Tartarian, Bing, Lapins and Van budded onto Colt or M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Cherry, Rainier-Bing-Lapins-Van Rainier, Bing, Lapins and Van budded onto Mazzard rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Cherry, Rainier-Bing-Utah Giant-Van Rainier, Bing, Utah Giant and Van budded onto Mazzard rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

North Star Dwarf Sour Cherry Attractive, densely foliated, naturally small tree grows to about 8-10 ft. Hardy to -40 deg F, very productive, resists cracking and brown rot. Often bears in second year. Large, meaty, tart, red-skinned fruit with red juice. Excellent for pies and cobblers, also used fresh when fully ripe. From Minnesota, introduced in 1950. 500 hours. Self-fruitful. USDA Zones 4-9.

Rainier Cherry Large, yellow with red blush. Sweet and flavorful. Very cold hardy. Midseason harvest. 700 hours. Pollenized by Van, Lambert, Lapins, Black Tartarian & Bing. USDA Zones 5-9.

Royal Crimson Cherry The long-awaited low-chill self-fruitful sweet cherry from Zaiger Genetics, Royal Crimson is a consistent producer of large, tasty, crimson-red fruit. Harvest is early to mid May. This important new variety is also an excellent pollenizer for Minnie Royal and Royal Lee. Estimated chill requirement 200-300 hours. Patent applied for. (Zaiger)

Royal Rainier Cherry Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Ripens early, about 3-5 days ahead of Rainier. Chill requirement 500 hours. Pollenized by Bing, Black Tartarian and Lapins. USDA Zones 5-9. (Zaiger)

Stella Cherry Self-fruitful - no pollenizer needed. Large, nearly black, richly flavored sweet cherry similar to its parent, Lambert. Late harvest. 400 hours. Pollinates Bing, except in mild winter climates. USDA Zones 5-9.

Utah Giant Cherry The industry favorite sweet cherry in Utah. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollenizer required: Bing, Lambert, Rainier, Van. USDA Zones 5-9.

Black Jack Fig Large, purplish-brown figs with sweet, juicy, strawberry-red flesh. Harvest August to October in Central CA. Naturally small (semi-dwarf) tree. 100 hours. Self-fruitful. USDA Zones 7-10.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Black Mission Fig The industry standard. Purplish-black skin, strawberry-colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Two crops per year. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

Improved Brown Turkey Fig Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted - coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful. USDA Zones 7-9.

Janice Seed-Less Kadota Fig A 'white' fig. Large, sweet, delicious, light greenish-yellow fruit with practically no seeds. Prolonged harvest, August through November at Fremont, CA. Suited to coastal and inland climates. Prune to any shape. 100 hours. Self-fruitful. USDA Zones 8-9. (Pat. No. 08254)

Panache Fig Especially fine flavor! Small to medium-sized fruit with green color and yellow Tiger stripes. Strawberry pulp is blood-red in color. 100 hours. Self-fruitful.

Peter's Honey Fig Beautiful, shiny fruit, greenish-yellow when ripe. Very sweet, dark, amber flesh. High quality. Superb for fresh eating. Warm location with a southern exposure is required for ripening fruit in maritime Northwest. Originated in Sicily. Good cold tolerance. Self-fruitful. USDA Zones 6-10.

Violette de Bordeaux Fig Small to medium size purple-black fruit with a very deep red strawberry pulp and distinctive, sweet, rich flavor. Brebas are pear-shaped with a thick, tapering neck, main crop figs are variable, often without neck. Medium eye. Excellent fresh or dried. Good for container culture or small spaces. Hardy. Self-fruitful. USDA Zones 5-10.

Multi-Bud Fruit Salad, GDust-Indep-JulElb-LSRosa-Blenheim Gold Dust Peach, Independence Nectarine, July Elberta Peach, Late Santa Rosa Plum and Blenheim Apricot budded onto Lovell rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Multi-Bud Fruit Salad, JulElb-Fantasia-Babcock-SRosa-Blenh July Elberta Peach, Fantasia Nectarine, Babcock White Peach, Santa Rosa Plum and Blenheim Apricot budded onto Nemaguard rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Multi-Bud Peach-Nect Showy Flowers, F-S-RB-MP-DD Fantasia Nectarine, Saturn Peach, Red Baron Peach, Mid-Pride Peach and Double Delight Nectarine budded onto Nemaguard rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Multi-Bud Peach-Nect White Flesh, HW-AS-WL-B-AR Heavenly White Nectarine, Arctic Supreme White Peach, White Lady White Peach, Babcock White Peach and Arctic Rose White Nectarine budded onto Lovell rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Lang Jujube Pear-shaped fruits are reddish-brown, dry, wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy to grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Pollenized by Li or other jujubes. USDA Zones 5-10.

Li Jujube Round shaped fruits are larger than Lang. Reddish brown, dry and wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy to grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Self-fruitful. USDA Zones 5-10.

Sugar Cane Jujube Round fruit is smaller than Li. Sweet, crunchy flesh. Tree is precocious, hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chill requirement. Partly self-fruitful.

Pakistan Fruiting Mulberry *Morus alba* 'Pakistan' Long (3 inches), firm, red to black, sweet fruit. Non-staining juice. Month-long early summer harvest. Fruit used fresh and for pies, jams and jellies. Large, vigorous, disease-resistant tree.

White Fruiting Mulberry *Morus alba* (*selection*) Medium-sized, sweet, white fruit shaped like blackberries. Grows at a moderate rate to 20-60 ft. depending on soil quality and depth. Drought tolerant once established. Grows larger and more rapidly with irrigation.

Spice Zee NectaPlum® Interspecific Nectarine The first NectaPlum® from Zaiger Genetics: a white-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable. Tree is quite ornamental. Tremendous purplish pink bloom in the spring, followed by a flourish of red leaves which mature into lush green in late summer. Self-fruitful. Very productive. 200-300 hours. High chill adaptable. (Pat. No. 13503) (Zaiger)

Arctic Blaze White Nectarine Taste test winner. One of the best of the low acid white nectarines: rich flavor and firm texture in early season, very sweet when soft ripe. Large size, red and creamy white skin. Harvest mid to late-August in Central CA, after Arctic Queen white nectarine. Estimated chilling requirement 700-800 hours. Self-fruitful. (Pat. No. 10174) (Zaiger)

Arctic Jay White Nectarine Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of acid and sugar. Ripens between Arctic Glo and Heavenly White white nectarines. 500 hours or less. Self-fruitful. (Pat. No. 9908) (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Arctic Star White Nectarine Earliest to ripen of the low acid, super-sweet white nectarines. Rave reviews in trial tastings. Beautiful dark red skin, snow white semi-freestone flesh. Ripens mid-June in Central CA, 4-5 weeks ahead of Arctic Rose. Low winter chilling requirement, about 300 hours. Self-fruitful. (Pat. No. 9332) (Zaiger)

Double Delight Nectarine Sensational fruit: consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red-skinned, freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

Fantasia Nectarine Popular, large yellow freestone. Early harvest fruit is firm ripe and tangy, later harvest is sweet with rich flavor: high scoring in taste tests. Late July/early August in Central CA. 500 hours or less. Self-fruitful.

Flavortop Nectarine Large, firm, yellow freestone of excellent quality. One of the highest scoring nectarines in DWN fruit tastings. One of the very best! Ripe mid-July in Central CA, between Independence and Fantasia. Large showy blossoms. 650 hours. Self-fruitful.

Garden Delight Miniature Nectarine Large yellow freestone is sweet, delicious, refreshing. Mid-August in Central CA. Heavy bearing 5-6 ft. tree, easily covered to protect from frost. 500 hours or less. Self-fruitful. (Zaiger)

Goldmine White Nectarine Long-time favorite in California and Western Oregon. Small to medium-sized white-fleshed freestone. Aromatic, juicy and sweet. Ripe in August. 400 hours. Self-fruitful.

Heavenly White - White Nectarine One of the highest-scoring fruits in Dave Wilson Nursery taste tests. Very large, firm, white-fleshed freestone. Superb acid/sugar balance and rich, complex flavor, a connoisseur's delight. Dull red and cream colored skin. Mid-July in Central CA. 650 hours. Self-fruitful. (Zaiger)

Jolly Red Giant Nectarine Very large fruit to 3 1/2 or more if properly thinned. Freestone, delicious flavor. Skin bright orange-red over yellow. Mid-July in Central CA. 400-500 hours. Self-fruitful. (Zaiger)

Liz's Late Nectarine Sprightly sweet, intense, spicy flavor - the state of the art in fruit breeding. Late August/early September in Central CA. 600-700 hours. Self-fruitful. (Pat. No. 9437) (Zaiger)

Necta Zee Miniature Nectarine Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less. Self-fruitful. (Zaiger)

Snow Queen White Nectarine Taste test winner. Sweet, juicy, early season white freestone. Late June harvest in Central CA, 2-3 weeks ahead of Babcock peach. Long-time favorite in So. Calif. Low chilling requirement, 250-300 hours. Self-fruitful.

Zee Glo Nectarine Taste test winner. Delicious late summer fruit with classic, zesty, nectarine flavor. Superb balance of acid and sugar. Attractive, dark red skin. Harvest about two weeks after Fantasia, mid to late August in Central CA. Showy pink blossoms in spring. 600-700 hours. Self-fruitful. (Zaiger)

Arctic Babe Miniature Interspecific Nectarine A result of innovative interspecific breeding by Zaiger Genetics, Arctic Babe is the first white-fleshed miniature nectarine. Super-sweet, large size fruit ripens early: late May to early June in central California. Reaching only 4-6 ft., this tree is easy to thin and harvest, easy to cover to protect blooms from frost. Chilling requirement not yet established, expected to be less than 700 hours. Self-fruitful. (Introduced for the 2017-18 season as 243BC331 Miniature Interspecific Nectarine)

Arbequina AS1® Olive Arbequina has become California's top variety for oil production. Mild and fruit flavor with low bitterness, the fruit is very high in oil content. It has a compact growing habit and is moderately frost hardy. Self-fruitful, but produces higher yields when planted with a pollenizer such as Arbosana.

Manzanillo Olive Manzanillo is the classic table olive. It's a large variety that can be eaten both green and ripe black. This variety becomes fruitier and less bitter as it ripens. Moderately cold hardy. Self-fruitful but produces higher yields with a pollenizer.

Mission Olive The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollenizer.

Arctic Supreme White Peach Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central CA. 700 hours. Self-fruitful. (Zaiger)

Babcock White Peach Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. High scoring in taste tests. Ripens mid-July in Central CA. Widely adapted (low chill requirement, yet not early blooming). 250-300 hours. Self-fruitful.

Carnival Peach Very late season yellow freestone. Large red-skinned fruit ripens late September/early October in Central CA. Vigorous, productive tree. Estimated chilling requirement 500 hours or less. Self-fruitful.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Donut (Stark Saturn) White Peach Unique white-fleshed fruit with a sunken center (shaped like a doughnut). Sweet, with a mild flavor described by some as almond-like. Ripens late June/early July in Central CA. Estimated chilling requirement 200-300 hours. Self-fruitful.

Elberta Peach Famous yellow freestone. Classic, rich peach flavor: high scoring in taste tests. Use fresh, canned or cooked. Ripe late July/early August in Central CA, up to 3-4 weeks later in colder climates. 600 hours. Self-fruitful.

Eva's Pride Peach Delicious, fine flavored peach with very low chilling requirement ripens 2-3 weeks before Mid-Pride. Medium to large-sized yellow freestone - also recommended as early season peach for moderate climates - harvest 3 weeks before July Elberta. 100-200 hours. Self-fruitful. (Zaiger)

Fay Elberta Peach Popular yellow freestone: juicy, moderately sweet, flavorful. Fresh/can/freeze/dry. Ripens 1-2 days later than Elberta in Central CA. (August 1st), but blooms earlier. 700 hours. Self-fruitful.

Frost Peach Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July ripening. Showy pink bloom in spring. 700 hours. Self-fruitful.

Garden Gold Miniature Peach Delicious yellow freestone, ripe 2 weeks after Elberta, more vigorous than other miniatures. Later bloom, less susceptible to frost damage. Showy blossoms. 5-6 ft. tree. 500 hours or less. Self-fruitful. (Zaiger)

Gold Dust Peach Best early season yellow peach: very high scores for flavor and overall appeal in Dave Wilson Nursery blind taste tests. Semi-freestone ripens mid to late June in Central CA, 2-3 weeks ahead of Redhaven. All purpose, superb for eating fresh. Not an early bloomer. 550 hours. Self-fruitful.

Honey Babe Miniature Peach Sweet, yellow freestone, rich peach flavor. Heavy bearing 5 ft. tree. Early to mid-July in Central California. Excellent choice for home orchard. 400 hours or less. Partly self-fruitful, sometimes shy-bearing without a pollinizer. (Zaiger)

Indian Free White Peach The all-time highest rated peach at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinize.

July (Kim) Elberta Peach Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400-500 hours. Self-fruitful.

May Pride Peach Very early peach for warm winter climates. Ripens in May, about with Desert Gold. Delicious, sweet and tangy, semi-freestone when fully ripe. Very large for such an early peach. Large, showy pink blossoms. 150-200 hours. Self-fruitful. (Zaiger)

Multi-Bud Peach Zaiger Pride Series, MP-AP-EP-JP-MP Mid-Pride, August Pride, Eva's Pride, June Pride and May Pride budded onto Nemaguard rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

O'Henry Peach Popular fresh market yellow freestone and an excellent choice for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in Central CA. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

Pix Zee Miniature Peach Large fruit ripens mid to late June in Central CA, two weeks before Honey Babe. Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. 400 hours or less. Self-fruitful. (Zaiger)

Red Baron Peach Flowering/fruitlet. Large, juicy, firm, richly flavored yellow freestone fruit. Highly rated in taste tests. Showy double red blossoms. Mid-July. Long-time favorite in Southern CA and Texas. Low chilling requirement, 250-300 hours. Self-fruitful.

Redhaven Peach Long one of the world's most widely planted peaches. High quality yellow freestone. Ripens early July in Central CA. Frost hardy, excellent producer. Fresh/freeze. 800 hours. Self-fruitful.

Snow Beauty White Peach Taste test winner: one of the all-time highest-scoring varieties in blind fruit tastings at Dave Wilson Nursery. Low acid, high sugar, tantalizing flavor. Large, very firm, attractive red skin. Harvest early to mid-July in Central CA. Estimated chilling requirement 750-850 hours. Self-fruitful. (Pat. No. 10175) (Zaiger)

Snow King White Peach Large, red-skinned, very firm, subacid, white-fleshed freestone. Farmer's market favorite for its appearance, sweetness and flavor. Harvest late August in Central CA, 3-4 weeks after Elberta. Showy blossoms. 800 hours. Self-fruitful. (Zaiger)

Strawberry Free White Peach Long-time favorite white freestone peach for CA. Very sweet, aromatic, juicy, with superb, delicate flavor. Early to mid-July in Central CA. Highly recommended for home orchards. 400-500 hours. Self-fruitful

Sugar Lady White Peach White flesh freestone, A favorite at fruit stands. Sweet, mild flavor, no tartness, very firm. Beautiful dark red skin. Harvest mid-July in Central CA. 700 hours. Self-fruitful. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Suncrest Peach Large, very firm, fine-flavored, yellow freestone. Bright red skin over yellow. Suncrest is the peach immortalized by the book Epitaph for a Peach: Four Seasons on My Family Farm, by David Mas Masumoto (1995). Harvest late July in Central CA. Frost hardy blossoms, consistent producer. Originated in Fresno, CA. Introduced in 1959. 500 hours. Self-fruitful.

Sauzee Swirl White Peach For white peach lovers! Sauzee Swirl is a new saucer ("donut") style peach from Zaiger Genetics. Beautiful white flesh with red marbling and a pronounced flavor that keeps you wanting more. Medium sized clingstone fruit harvests in mid to late May in central California, a full month before Stark Saturn. The ripe fruit is distinctively ornamental hanging in the tree, and beautiful when served cut open. Estimated chill requirement 400 hours. Self-fruitful. Patent Pending. (Zaiger)

Bartlett Pear World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis.

Bosc Pear Long and narrow shape, brown skin. Superb quality, one of the best. Harvest late October. Use fresh or cooked. Susceptible to fire blight in warm, moist climates. 500-600 hours. Pollenized by Bartlett or other pear.

California Pear Max Red Bartlett x Comice. Home orchard variety for hot inland valley climates: Redding, Fresno, Bakersfield. Yellowish green with red blush. Excellent quality, very productive. August harvest. 500-600 hours. Self-fruitful.

D'Anjou Pear Large, short necked, firm, good quality, keeps well. Harvest September 1st, one month after Bartlett in Central CA. 800 hours. Pollenized by Bartlett.

Harrow Delight Pear Fire blight resistant, fruit similar to Bartlett. Yellow skin with attractive red blush. Smooth, fine flesh is especially flavorful. Ripe two weeks before Bartlett. Heavy bearing tree. Introduced in 1982 (Ontario, Canada). 800 hours. Interfruitful with Bartlett, Bosc, D'Anjou and Moonglow.

Kieffer Pear Medium to large late season fruit for canning and cooking. Sprightly flavor, coarse texture. Resists fire blight, tolerates hot climates. Dependable crops. 200-300 hours. Self-fruitful.

Multi-Bud Pear Asian, Hosui-Shinseiki-20thCent-Chojuro Hosui, Shinseiki, 20th Century and Chojuro budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Pear Disease-Resist., Warren-Kieffer-HarrwD-BIPr Warren, Kieffer, Harrow Delight and Blake's Pride budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Pear Espaliered, Com-Bart-Bosc-DAnj-RD-FB 6n1 6n1 espalier: Comice, Bartlett, Bosc, D'Anjou, Red D'Anjou and Flemish Beauty.

Multi-Bud Pear, Comice-D'Anjou-Bartlett-Bosc Comice, D'Anjou, Bartlett and Bosc budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Seckel Pear Connoisseurs' favorite. Sweet, flavorful, aromatic, spicy, perhaps the best dessert pear. Russeted brown skin. Resists fire blight. Does not cross-pollinate with Bartlett. 500 hours. Self-fruitful.

Warren Pear Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20 deg F. From Mississippi. 600 hours. Self-fruitful

Chocolate Persimmon Small to medium size, oblong, bright red skin. Sweet, spicy, firm, brown flesh, superb flavor the choice of connoisseurs. Astringent until ripe. 200 hours. Self-fruitful.

Coffeecake Persimmon Unique spicy sweet flavor that instantly evokes images of cinnamon pastry, hot coffee and morning sunshine. Coffeecake ripens about the same time as Chocolate and about three weeks to one month earlier than Fuyu. Coffeecake Persimmon is non-astringent and can be eaten while still firm. Hardy, attractive tree, practically free of pests and disease. Estimated chilling requirement: 200 hours or less. Another persimmon variety required as a pollinizer. Goshu or Chocolate are the best pollinizers for Coffeecake.

Fuyu (Jiro) Persimmon Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

Giant Fuyu Persimmon Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful.

Hachiya Persimmon Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. 200 hours. Self-fruitful.

Izu Persimmon Very sweet, tasty, non-astringent fruit ripens about three weeks before Fuyu. Medium to large size, round shape. Relatively small tree, good choice for backyard persimmon. 100 hours. Self-fruitful.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Candy Heart Pluerry™ Interspecific Plum - New for 2016 - Candy Heart, having Japanese plum and sweet cherry in its parentage, is a taste-test proven treat for fruit lovers. Its skin is dark speckled red, the amber/red flesh slightly subacid and very sweet, with a wonderfully unique fl-avor. This variety has an extended hang time, reaching peak ripeness around mid August in Central California. Pollenized by Sweet Treat Pluerry™ and Burgundy plum. (U.S. Plant Patent Pending) (Zaiger)

Sugar Twist Pluerry™ Interspecific Plum Newest in the Zaiger Pluerry™ line of high-flavor interspecific plums (plum + cherry), Sugar Twist is unique in that it harvests a month earlier than Sweet Treat. This hybrid has red skin and yellow flesh with an especially enjoyable flavor: cherry sweet with a plum "twist". Pollenized by Flavor King Pluot®, Emerald Beaut plum and most mid to late blooming varieties of Pluot®, Pluerry™ and Japanese plum. Estimated to require 800 chill hours. Patent Pending. (Zaiger)

Beauty Plum Sweet, flavorful plum, more widely adapted than Santa Rosa (more productive in cool, rainy climates). Red over yellow skin, amber flesh streaked red. Ripens June in Central CA, a week or more before Santa Rosa. 250 hours. Self-fruitful.

Burgundy Plum Maroon colored skin and semi-freestone flesh. Sweet, with little or no tartness and a very pleasing, mild flavor. High taste test scores. Prolonged harvest, mid-July to mid-August in Central CA. Very productive tree with narrow, upright habit. 300 hours. Self-fruitful.

Elephant Heart Plum Home orchard favorite: large, heart-shaped fruit with sweet, juicy, richly flavored, firm red flesh. Dark reddish-purple mottled skin. Long harvest season - September in Central CA. Hardy, heavy bearing tree. 500 hours or less. Pollenize with Beauty or Santa Rosa.

Emerald Beaut Plum One of the highest-rated plums in blind fruit tastings at DWN. Light green skin, greenish-yellow to orange freestone flesh. Harvest begins late August in Central CA. Ripe fruit continues to sweeten, becoming exceptionally sweet, but remaining crisp and crunchy. Ripe fruit holds on tree longer than any other stone fruit: two months or more! 600-700 hours. Pollenizer required: Beauty, Burgundy, Late Santa Rosa, Nubiana, Flavor King Pluot. (Pat. No. 9162) (Zaiger)

Golden Nectar Plum Popular yellow dessert plum. Large, oblong fruit with waxy, thin, amber skin. Amber flesh is firm, sweet and flavorful. Very small pit. August harvest in Central CA. 400 hours or less. Self-fruitful.

Methley Plum Earliest plum: June in Central CA. Juicy, sweet, red flesh, mild flavor. Reddish purple skin. Attractive tree is heavy bearing and vigorous. Extremely cold hardy. 250 hours or less. Self-fruitful.

Multi-Bud Plum Japanese, Nub-EHrt-LSRosa-Laroda-Beauty Nubiana, Elephant Heart, Late Santa Rosa, Laroda and Beauty budded onto Citation rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Santa Rosa Plum Most popular plum in California & Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

Satsuma Plum Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollenized by Santa Rosa or Beauty.

Weeping Santa Rosa Semi-Dwarf Plum One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit: long slender limbs bow gracefully to the ground. Easily espaliered. 200-400 hours. Self-fruitful.

Dapple Dandy Pluot® Interspecific Plum Taste test winner. Ranks with Flavor King Pluot® among the all-time top five best flavored fruits at Dave Wilson Nursery tastings. Creamy white and red fleshed freestone with wonderful plum-apricot flavor. Skin greenish-yellow with red spots, turning to a maroon and yellow dapple. August harvest in Central CA. 400-500 hours. Pollenized by Flavor Supreme Pluot®, Flavor King Pluot®, Santa Rosa, Catalina or Burgundy Plum. (Pat. No. 9254) (Zaiger)

Emerald Drop Pluot® Interspecific Plum Medium to large fruit with green skin and yellow-orange flesh. Prolonged harvest: early picked fruit is firm, yet juicy and sweet. Left to hang, fruit turns greenish-yellow with honey-like orange flesh. Upright tree sets heavy crops once established. Harvest mid-July to late August. Originally tasted tested as 7HC165. 400 hours or less. Pollenized by Flavor Grenade Pluot® or Santa Rosa plum. (Pat. No. 14599) (Zaiger)

Flavor Grenade Pluot® Interspecific Plum Elongated green fruit with red blush. Crisp texture, explosive flavor. Taste test winner. Hangs on the tree for 4-6 weeks. Pollenized by Flavor King Pluot®, Dapple Dandy Pluot®, Emerald Drop Pluot® or Santa Rosa plum. 300-400 hours. (Pat. No. 12097) (Zaiger)

Flavor King Pluot® Interspecific Plum Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central CA. Naturally small tree. 400 hours or less. Pollenized by Flavor Supreme Pluot® or Dapple Dandy Pluot® and Santa Rosa or Late Santa Rosa plum. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Flavor Queen Pluot® Interspecific Plum Exquisite plum/apricot hybrid with candy-like sweet, wonderfully pleasing flavor. Greenish-yellow skin, amber-orange flesh. Prolonged harvest: mid-July thru August at Hickman, CA. 400-500 hours. Pollenized by Dapple Dandy Pluot® or Flavor Supreme Pluot® or by a Japanese plum such as Burgundy. Not pollenized by Flavor King Pluot®. (Zaiger)

Flavor Supreme Pluot® Interspecific Plum Taste test winner. Plum/apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central CA, about two weeks before Santa Rosa. 700-800 hours. Pollenized by Santa Rosa and Late Santa Rosa plums, or Flavorosa, Flavor Queen and Geo Pride Pluot®. (Zaiger)

Multi-Bud Pluot® I.S. Plum Zee Sweet® Nuggets Splash, Emerald Drop, Flavor Grenade and Geo Pride budded onto Citation rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Pluot® I.S. Plum, FI King-FI Queen-FI Supr-DapDan Flavor King, Flavor Queen, Flavor Supreme and Dapple Dandy budded onto Citation rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Parfianka Pomegranate Large size red fruit is sweet with a hint of acidity. Arils are red with very small edible seeds. Vigorous upright plant sets a heavy crop dependably. Maintain at any height with summer pruning. Consistently receives the highest praise for overall flavor. Great for juice or fresh eating. A Dr. Gregory Levin introduction through U.C. Davis. Very highly rated in U.C. Davis taste tests. Some rate Parfianka as the best tasting pomegranate. Required chill hours 100-200. Self-fruitful, best in zones 7-10.

Pink Satin Pomegranate Medium to large size, medium pink to dark red fruit with medium to large, light-pink edible seeds. Wonderful refreshing light colored juice is non-staining, with a sweet, fruit punch flavor. Plant is vigorous and can be grown as a shrub or tree. Keep at any height by summer pruning. Eat fresh, juice or use in salads. Excellent source of antioxidants. Chill requirements 150-200 hours. Self-fruitful.

Red Silk Pomegranate Medium to large-sized fruit with a brilliant red silky exterior. Large, firm yet edible seeds have a sweet berry flavor and a great acid/sugar balance. Naturally semi-dwarf tree has a slightly spreading growth habit and sets large crops. Grow as a tree or shrub and keep at any height by summer pruning. Excellent source of antioxidants. Eat fresh or use in cooking. 150-200 hours. Self-fruitful.

Sweet Pomegranate Sweeter fruit than Wonderful, more widely adapted (better quality in cool-summer climates). Small, glossy-leafed, ornamental tree with showy orange-red blossoms in late spring. Very suitable

to espalier and container growing. Harvest late summer. Unsplit ripe fruit stores in cool, dry place for two months or more. Very low chilling requirement, about 100 hours. Self-fruitful.

Wonderful Pomegranate Large, purple-red fruit with delicious, tangy flavor. Best quality in hot inland climate. Gaudy red orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

Early Italian (Richards) Prune Similar to Italian, but sweeter, slightly larger and more productive. Shorter growing season requirement than Italian (ripens 1-2 weeks earlier). Originated near Yakima, Washington. Introduced in 1935. 800 hours. Self-fruitful.

French Improved Prune California's commercial prune. Reddish purple skin, dark amber flesh. Very sweet, high quality fruit dessert/can/dry. 800 hours. Self-fruitful.

Emerald Southern Highbush Blueberry Produces abundant clusters of large to very large berries with tasty, balanced sweet flavor. Very productive and highly rated. Zones 7-10. Self-fruitful. Estimated at 250 hours chill or less. (U.S. Plant Patent #12165)

Jewel Southern Highbush Blueberry One of California's leading commercial varieties due to its high adaptability. Exceptional growth and high yields. Midseason harvest of large to very large berries with tangy sweet flavor. Chill requirement estimated at 200 hours. Self-fruitful, zones 7-10. (U.S. Plant Patent #11807)

Jubilee Southern Highbush Blueberry Southern Highbush. Midseason, sweet, firm berry. Upright and quite compact bush, with fruit borne on the outer periphery. Chilling requirement is estimated at 400-500 hours.

Misty Southern Highbush Blueberry Southern Highbush. Early season. In the West Misty is quite vigorous, growing very well on the coast and in the inland heat. This especially flavorful fruit does well in areas with chilling as low as 150 hours and all areas with mild winters and hot summers.

O'Neal Southern Highbush Blueberry Southern Highbush. Large fruit is especially sweet and flavorful. Early season. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

Reveille Southern Highbush Blueberry Southern Highbush. Midseason. DWN house favorite. This berry has pleasing crunchy texture and excellent flavor. Chilling hours are listed at 400-500 hours.

Sharpblue Southern Highbush Blueberry Southern highbush. Excellent flavor. Nearly evergreen in mild winter climates. Bears fruit nearly year-round. Vigorous plant to 6 ft. Dime-sized dark blue fruit. 200 hours.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Southmoon Southern Highbush Blueberry Southern highbush. Exceptional berries with superb flavor. Florida native with vigorous, upright character. Performs well in California, both inland and coastal. Prefers light sandy soils. 200-300 hours. (Pat No. 9834)

Sunshine Blue Southern Highbush

Blueberry Southern highbush. Great flavored firm berries. Ripens May 10 through June 15 at Gainesville, Florida. Semi-dwarf evergreen bush with great fall color. Showy hot pink flowers fade to white in spring. Self-fruitful. Estimated chilling required 150 hours, but very cold hardy as well.

Top Hat Southern Highbush Blueberry Lowbush, dwarf variety, growing to 16-24 tall. Medium, firm, sweet, light blue berries that last for several weeks. Good flavor. Completely covered with white, bell shaped flowers for several weeks. Great fall color. Self-fruitful. Perfect for growing in a pot on the patio or indoors in a sunny window. Hardy in USDA Zones 3-8.

Baba Red Raspberry Everbearing Red Raspberry - Extra large berries up to 1 1/2" long. Wonderful warm weather variety particularly well suited to southern California's coastal and inland valleys. Fine flavor and good for all uses. Bears heavy crop May-July with a smaller late summer crop through fall. Hardy to zero degrees. Self-fruitful. Best in zones 4-11.

Black Satin Blackberry Vigorous, very productive plant. Large berries. Midseason producer, July in most areas. Requires some support due to heavy cropping and limber, semi-trailing plant structure. USDA zones 6-9.

Boysenberry Thornless *Rubus ursinus* var. loganobaccus, a hybrid of blackberry, raspberry, dewberry and loganberry. Very large berry up to 2.5", dark maroon in color with an intense, tangy, sweet flavor. Excellent quality with few seeds and a pleasant aroma. Vine-like trailing growth habit. Harvest through summer. Self-fruitful, best in zones 5-10.

Canby Thornless Raspberry Thornless - the only red thornless raspberry. Large to very large fruit are firm, juicy and of fine flavor. Good for all uses. Viroid and aphid resistant. Very winter hardy, grows best in cooler summer areas. Harvest June, July. Self-fruitful, best in zones 4-9.

Fall Gold Raspberry Everbearing - Hybrid of Taylor X wild Korean mountain berry X Fall Red. Large to very large golden berries of excellent flavor. Extremely sweet and soft textured. Very adaptable and winter hardy. Harvest June through fall. Self-fruitful. Best in zones 4-11.

Heritage Raspberry Everbearing - Large, sweet, dark red berries. Mild flavor and excellent quality. Good for all uses. Moderate early crop in June, July. Heavier late crop August through fall. Berries keep well on or off the vine. Upright growth habit. Self-fruitful. Best in Zones 4-11.

Jewell Black Raspberry Produces compact clusters of large to very large fruit. Rich raspberry flavor. Very high quality, good for pies, preserves and fresh use. May-June harvest. Vigorous, hardy vines are the most disease resistant of all black raspberries. Upright habit, no support required. Self-fruitful. Best in zones 4-11.

Marion Blackberry Medium to large size firm, sweet, bright berries. Excellent for fresh and dessert use. Rated by many as the best pie berry. Long harvest June through summer. Cross of Olallieberry developed in Oregon where it is a major commercial variety. Very long, vine-like canes require support. Self-fruitful. Best in zones 6 - 9

Olallieberry A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.

Prime Ark Freedom® Blackberry First thornless primocane blackberry, from U of Arkansas. Large fruit with good flavor, floricanes bloom ripens early July. New canes (primocanes) begin fruiting mid-August in years when summer heat is not excessive. For home gardens and local markets; short storage life. Upright growth habit, but may require some support. USDA Zones 5-9. Pat. No. 26990.

Triple Crown Blackberry Semi-trailing, thornless. Medium to large flavorful berries. Dense foliage prevents sunscald. Vigorous vines to 15' require support. Very productive, reliable harvests. Widely adapted, excellent home garden variety. USDA Zones 5-12.

Willamette Red Raspberry Large to very large, long-conic berries. Very firm and deep red. Lower sugar content, slightly tart flavor. Good for all uses. Berries hold and store well. Main harvest June, July. Some support required. Self-fruitful. Best in Zones 5-10.

Goji Berry Bright red fruit used either fresh or dried. Contains the highest antioxidant level of any fruit type. Drought tolerant once established and very cold hardy. Self-fertile. USDA zone 5-9.

Black Velvet Gooseberry Produces heavy crops of delicious large and sweet deep purple berries. These berries resemble blueberries when allowed to fully ripen on the vine. Very mildew and disease resistant along with being very winter hardy. Best in zones 4 - 8. Self-fruitful.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Hinnomaki Red Gooseberry Medium-sized red berry that has a slightly tangy skin and very sweet flesh. The bush has an upright growing habit and is mildew and disease resistant. More adaptable to warmer winter climates. Zone 4-9. Self-fruitful.

Pixwell Gooseberry Large, light green berries that turn pink and sweet when fully ripe. Practically thornless, this variety is relatively easy to pick. Purple fall color makes this a good choice as an edible ornamental. Mildew resistant, thriving in partial shade in hot summer areas. Adaptable to warmer winter climates. Zone 4-9. Self-fruitful.

Black Monukka Seedless Grape Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Use fresh or for raisins. Early midseason. 100 hours. Self-fruitful. Cane or spur prune.

Cabernet Sauvignon Grape Late season red wine grape with small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful. Cane prune.

Chardonnay Grape For white burgundy wines. Small round berry. Best quality where summers are cool. Vigorous vine, Very cold hardy. 100 hours. Self-fruitful. Cane prune.

Concord Seedless Grape American grape, a sport of Concord. Berries very similar to Concord, but seedless (or seeds very rare). Bluish-black skin, green flesh, distinctive Concord flavor. 100 hours. Self-fruitful. Cane prune.

Crimson Seedless Grape Newer late season seedless grape, ripens early October in Fresno, CA. Medium size, firm, very sweet, excellent quality. Cane prune. 100 hours. Self-fruitful.

Flame Seedless Grape Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens before Thompson. Vigorous. 100 hours. Self-fruitful. Cane or spur prune.

Merlot Grape Black berry, used for distinctive red wines. Best quality in cooler regions. 100 hours. Self-fruitful. Cane or spur prune.

Thompson Seedless Grape Most popular grape in CA, AZ. Fresh and raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful. Cane prune.

Zinfandel Grape For fruity red wines. Medium size, round, juicy, reddish-black berry, early midseason. Prefers mild winters, cool summer. Heavy bearing. 100 hours. Self-fruitful. Cane or spur prune.

Tomuri Male Kiwi *Actinidia chinensis*, aka *A. deliciosa*. Pollenizer for Vincent female. Does not bear fruit. One male can pollinize up to eight Vincent females.

Vincent Female Kiwi *Actinidia chinensis*, aka *A. deliciosa*. Low chilling requirement, adapted to Southern CA. Tasty, well-regarded fuzzy-skinned fruit. Pollenized by Tomuri Male.

Dwarf Everbearing Mulberry *Morus sp. 'Dwarf Everbearing'* This bush form of mulberry continuously produces sweet blackberry-like fruit throughout the season. A great choice for container gardening, minor pruning will keep the plant compact. Mature height 6'-8' if grown in the ground. Widely adapted, self-fruitful. USDA zones 5-11.

All-in-One Genetic Semi-Dwarf Almond No. 1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter and frost hardy. 300-400 hrs. Self-fruitful. (Zaiger)

Kerman Female Pistachio Long hot summers required to ripen. Plant from containers only, do not disturb root ball when handling. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollenized by Peters.

Peters Male Pistachio Pollenizer for Kerman. Does not bear fruit. One Peters pollinizes up to eleven females. Plant from containers only. Drought-resistant once established. 800 hours.

Chandler Walnut Developed by U.C. Davis. Heavy bearing (bears on lateral buds, not just terminals like Hartley). High quality light-colored nuts. Smaller tree than Hartley, good choice for backyard walnut. Fall harvest. 700 hours. Self-fruitful.

Pedro Walnut Very small tree, less than 2/3 the size of other varieties. Well-sealed nut, similar to Payne, has perhaps the finest-flavored kernel - winner of consumer taste tests. Widely adapted, excellent choice for home planting. 400 hours. Self-fruitful. (Rootstock: NCB walnut.)

Kwanzan Flowering Cherry *Prunus serrulata 'Kwanzan'* Spectacular, large, double, rosy pink flowers, drooping clusters. Midseason bloom, long blooming period. Upright tree to 30 ft.

Mt. Fuji Flowering Cherry *Prunus serrulata 'Mt. Fuji'* Early, semi-double white, aging to purplish-pink. Horizontal habit, 20 ft. high.

Floribunda Flowering Crabapple Profuse single pink flowers, aging white. Green leaves, small fruit. Height to 20 ft., spreading habit.

Genetic Dwarf Flowering Plum *Prunus cerasifera 'Genetic Dwarf'* Naturally dwarf, compact-growing tree. Pink blossoms, intensely-colored purple foliage. Fruitless. Grows to 10-12 ft.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Krauter Vesuvius Flowering Plum, 5 ft. trunk Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree, 18 ft. high by 12 ft. wide. Favorite purple leaf plum for California. Foliage of newly planted trees sometimes greenish until vigorous growth begins. 5 ft. trunk.

Dura-Heat® River Birch *Betula nigra* 'BNMTF' Highly resistant to birch borers and miner. Less vigorous than *Betula nigra* species. White bark, dense canopy of dark green leaves.

Western Catalpa *Catalpa speciosa* Widely adapted - cold or hot climates. All soils. Large, heart-shaped leaves, long seed capsules shaped like beans. White flowers in late spring and summer. Flowers & pods litter beneath tree. 40-60 ft. high.

Drake Evergreen Elm *Ulmus parvifolia* 'Drake' Deciduous in cold climates, evergreen elsewhere. Very fast growth to 50 ft. Long arching/weeping limbs, tree wider than tall. Virtually pest/disease-free. Sunset Zones 8-9, 12-24.

True Green Elm *Ulmus parvifolia* 'True Green' Graceful rounded tree is fast growing to 30-40 ft. with nearly evergreen foliage. Well adapted to any soil and weather conditions, drought tolerant.

Autumn Blaze® Maple *Acer x freemanii* 'Jeffersred' Hybrid of silver maple and red maple. Has character and fall color similar to red maple with adaptability comparable to silver maple. Dense oval shaped canopy. Bright red to orange fall color. Drought tolerant. Sunset Zones 1-9, 14-24.

October Glory® Maple *Acer rubrum* 'PNI 0268' Nearly round canopy, glossy green foliage. Better suited to mild winter/hot summer climates than other red maples. Showy red fall color. Ample soil moisture required. Reaches 40 by 35 ft. Sunset Zones 1-9, 14-17.

Red Sunset® Maple *Acer rubrum* 'Franksred' Upright growth to 40 ft., oval-shaped canopy. Glossy, dark green leaves. Bright red or orange-red fall color. Ample soil moisture required. Sunset Zones 1-9, 14-17.

Summer Red® Maple *Acer rubrum* 'HOSR' Burgundy-colored new growth fades to a dark leathery green while growing tips retain red coloration. Dense canopy and fast growing. Zone 5.

Oklahoma Redbud *Cercis canadensis* 'Oklahoma' Spectacular purplish-red flower clusters in early spring (after flowering plums, before flowering crabapples). Attractive tree with round-shaped canopy and glossy, heart-shaped leaves. Tolerates hot summers. Largest of the redbuds, to 30-35 ft. Sunset Zones 1-3, 7-20.

Columbia Sycamore *Platanus x acerfolia* 'Columbia' Similar to London planes, but having greater resistance to anthracnose. Fast-growing to 80 ft. Large maple-like leaves, distinctive patchy bark pattern. Very desirable for street, park, and lawn plantings. Sunset Zones 2-24.

Village Green™ Zelkova *Zelkova serrata* 'Village Green' Fast-growing to 40-50 ft., vase shaped, more upright than sawleaf variety. Dark green elm-like leaves with sawtooth edges. Smooth gray bark like beech. Widely adapted, few problems. Fall color varies. Sunset Zones 3-21.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.
