Dave Wilson Nursery varieties for 2019:

Anna Apple Remarkable fruit for mild winter climates in So. Calif., So. Ariz. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. Keeps 2 months in refrigerator. 200 hours. Self-fruitful or pollinized by Dorsett Golden or Einshemer. USDA Zones 5-10.

Buckeye® Gala (Simmons cv.) Apple Discovered as a sport of Imperial Gala in Rogers, Ohio, the Buckeye Gala is a highly colored, almost solid red apple with a deep burgundy stripe. It matures with other Gala selections and is comparable in size, firmness, fruit quality and storage life. The Buckeye Gala tree is a very precocious annual bearer with a vigorous, upright, semi-spur habit. Self-fertile, maximum yields with cross-pollination. (U.S. Plant Patent No. 10840)

Fuji Apple Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

Ghost Apple For the apple lover seeking a truly unique variety, the Ghost apple is in a category by itself. Completely white skin and flesh with sweet, sub-acid flavor, a taste pleaser at several fruit tastings. Does well in hot climates. Harvest in early July in central California. Pollenized by any mid-season blooming apple. 300-400 chill hours, high-chill adaptable. USPP applied for. (Zaiger)

Golden Delicious Apple Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollenizer for Red Delicious. Midseason harvest (September in Central CA). 700 hours. Self-fruitful. USDA Zones 5-10.

Granny Smith Apple From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6-9.

Gravenstein Apple Famous for sauce and baking, also used fresh. Crisp, juicy, flavorful & tart. Early bloom, early harvest. 700 hours. Pollenizer required: Empire, Fuji, Gala, Red Delicious. Not a pollenizer for other varieties. USDA Zones 2-9.

Honeycrisp Apple Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens mid-August. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3-8.

Jonathan Apple Heavy annual bearer, high quality when well grown. Cooks well. Medium to dark red. Crisp, juicy, moderately tart, flavorful. August harvest in Central CA. 700-800 hours. Self-fruitful. USDA Zones 4-8.

Multi-Bud Apple Espaliered, Low-Chill, Anna-Dorsett Golden-Fuji 3n1 Anna, Dorsett Golden and Fuji budded onto M-111 rootstock.

Multi-Bud Apple, Espaliered 3-tier, Braeb-Fuji-Gala-Gldn Del-Grav-Red Del 6n1 Six apple varieties on one 3-tier espaliered tree: Braeburn, Fuji, Gala, Golden Delicious, Gravenstein and Red Delicious.

Multi-Bud Apple, Fuji-Gala-Mutsu-Jonagold Fuji, Gala, Mutsu and Jonagold budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Mutsu Apple A favorite of connoisseurs: very large, crisp and flavorful. Late September/October harvest. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 500 hours. Pollenizer required: Red Delicious, Granny Smith, Fuji, Gala. USDA Zones 4-8.

Pink Lady® Apple Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 300-400 hours. USDA Zones 6-9.

Red Delicious (Bisbee Spur) Apple Sweet, crisp, flavorful perhaps the best Red Delicious. Early fall. Small, compact tree. Good pollinizer for most other apples. 700 hours. Pollenized by Liberty, Granny Smith, Golden Delicious, Fuji, Gala. USDA Zones 4-7.

Blenheim (Royal) Apricot All-purpose freestone. Sweet, aromatic, flavorful - the long-time No. 1 apricot in California. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7-8.

Earli-Autumn Apricot Wonderful flavor as tested by Dave Wilson Nursery both fresh and dried. Will please even the most critical of apricot lovers. Late harvest, first two weeks of August. 500 hours or less. Self-fruitful. (Pat. No. 9937). USDA Zones 7-9. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Harcot Apricot From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid-June in Central CA. Sweet, juicy, rich flavor one of the best. 700 hours. Self-fruitful.

Tilton Apricot No.1 apricot for canning, excellent fresh or dried as well. Medium to large, firm, rich flavor - one of the best. Widely adapted. Early July in Central CA. 600 hours. Self-fruitful. USDA Zones 5-9.

Tomcot Apricot A consistently productive apricot variety. Large, orange fruit with firm, sweet flesh. Slightly tart, old-time apricot flavor. Early harvest, 2 - 3 weeks before Wenatchee Moorpark. Originated at Prosser, WA, introduced in 1989. 500 hours or less. Partly self-fruitful, largest crops if cross-pollenized by another apricot. USDA Zones 4-8.

Wenatchee Moorpark Apricot Long time favorite in Western OR & WA. Recommended for other western climates where spring rains and frosts limit apricot culture. Flavorful fruit used fresh, dried, canned. 700 hours. Self-fruitful. USDA Zones 5-9.

Flavor Delight Aprium® Interspecific

Apricot Apricot-plum hybrid. Resembles an apricot but with a distinctive flavor and texture all its own. High taste-test scores, one of the most flavorful early season fruits. Early June. Very low chilling requirement, less than 300 hours. Self-fruitful, but largest crops when pollenized by another apricot. (Zaiger)

20th Century Asian Pear Juicy, sweet, mild flavored fruit is crisp like an apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollenized. by Shinseiki, Bartlett, or other.

Chojuro Asian Pear Russeted golden brown skin. Crisp like an apple when ripe. Harvest mid-August in Central CA. 450 hours. Pollenized by Hosui, Shinko, or other pear.

Hosui Asian Pear Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-August in Central CA. 300-400 hours. Pollenized by Shinko, Chojuro, Bartlett, or 20th Century.

Kikusui Asian Pear Juicy, sweet, yellow-skinned fruit - crisp like an apple when ripe. Superb fresh eating, one of the best. Easy to grow. Keeps well. Mid-August in Central CA. 450 hours. Partly self-fruitful or pollenized by Ishiiwase or 20th Century.

Shinko Asian Pear Late ripening - September in Central CA - and excellent quality. Juicy, sweet, flavorful, refreshing, crisp like an apple. Golden brown russeted skin. 450 hours. Pollenized by Hosui, Chojuro, Kikusui, Bartlett

Shinseiki Asian Pear Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August in Central CA. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 250-300 hours. Self-fruitful.

Bing Cherry Large, firm, juicy, sweet, nearly black when ripe. Superb flavor, the No. 1 cherry. Midseason. Large vigorous tree. Pollenized by Black Tart, Van, Rainier and Lapins. Also Stella in colder climates. 700 hours. USDA Zones 5-9.

Craig's Crimson Cherry Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Harvest begins early. 500-600 hours. USDA Zones 5-9. (Zaiger)

English Morello Sour Cherry Late-ripening tart cherry for cooking, sometimes eaten fresh when fully ripe. Dark red to nearly black fruit with dark juice. Small, round-headed tree with drooping branches (easy to harvest). European origins obscure, introduced to America prior to 1862. 500 hours or less. Self-fruitful. USDA Zones 4-9.

Lapins Cherry Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

Montmorency Sour Cherry Large, light red skin, yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy. Very heavy bearing. 500 hours. Self-fruitful. USDA Zones 4-9.

Multi-Bud Cherry, Rainier-Bing-Lapins-Van Rainier, Bing, Lapins and Van budded onto Mazzard rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Cherry, Rainier-Bing-Utah Giant-Van Rainier, Bing, Utah Giant and Van budded onto Mazzard rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Rainier Cherry Large, yellow with red blush. Sweet and flavorful. Very cold hardy. Midseason harvest. 700 hours. Pollenized by Van, Lambert, Lapins, Black Tartarian & Bing. USDA Zones 5-9.

Royal Rainier Cherry Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Ripens early, about 3-5 days ahead of Rainier. Chill requirement 500 hours. Pollenized by Bing, Black Tartarian and Lapins. USDA Zones 5-9. (Zaiger)

Utah Giant Cherry The industry favorite sweet cherry in Utah. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollenizer required: Bing, Lambert, Rainier, Van. USDA Zones 5-9.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Green Gage (Bavay's) European Plum Superior selection of gage-type European plum. Small to medium-sized, richly flavored & very sweet. Excellent fresh and for cooking. More productive in moderate winter climates than common Green Gage. Originated in Belgium in 19th century. Estimated winter chilling requirement 700 hours. Self-fruitful.

Multi-Bud Fruit Salad, GDust-Indep-JulElb-LSRosa-Blenheim Gold Dust Peach, Independence Nectarine, July Elberta Peach, Late Santa Rosa Plum and Blenheim Apricot budded onto Lovell rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Lang Jujube Pear-shaped fruits are reddish-brown, dry, wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy to grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Pollenized by Li or other jujubes. USDA Zones 5-10.

Li Jujube Round shaped fruits are larger than Lang. Reddish brown, dry and wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy to grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Self-fruitful. USDA Zones 5-10.

Spice Zee NectaPlum® Interspecific Nectarine The first NectaPlum® from Zaiger Genetics: a white-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable. Tree is quite ornamental. Tremendous purplish pink bloom in the spring, followed by a flourish of red leaves which mature into lush green in late summer. Self-fruitful. Very productive. 200-300 hours. High chill adaptable. (Pat. No. 13503) (Zaiger)

Arctic Glo White Nectarine Exciting, sprightly-sweet, early season white-fleshed nectarine. High scoring in taste tests: nice balance of sugar and acid, very appealing flavor. Highly recommended for home orchards. Late June/ early July in Central CA. 400-500 hours. Self-fruitful. (Zaiger)

Arctic Queen White Nectarine Delicious, super-sweet white nectarine, very similar to Arctic Rose, but ripening 3-4 weeks later (early August in Central CA). Rich flavor and nice crunchy texture when firm ripe, extremely sweet when fully ripe. High-scoring in taste tests. 600-700 hours. Self-fruitful. (Zaiger)

Double Delight Nectarine Sensational fruit: consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red-skinned, freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

Fantasia Nectarine Popular, large yellow freestone. Early harvest fruit is firm ripe and tangy, later harvest is sweet with rich flavor: high scoring in taste tests. Late July/early August in Central CA. 500 hours or less. Self-fruitful.

Flavortop Nectarine Large, firm, yellow freestone of excellent quality. One of the highest scoring nectarines in DWN fruit tastings. One of the very best! Ripe mid-July in Central CA, between Independence and Fantasia. Large showy blossoms. 650 hours. Self-fruitful.

Harko Nectarine One of the highest scoring nectarines in DWN fruit tastings. Cold hardy Canadian variety has showy, large, single pink blossoms. Ripens with Redhaven Peach in early July in Central CA. Tolerant of bacterial spot and brown rot. 800 hours. Self-fruitful.

Heavenly White - White Nectarine One of the highest-scoring fruits in Dave Wilson Nursery taste tests. Very large, firm, white-fleshed freestone. Superb acid/sugar balance and rich, complex flavor, a connoisseur's delight. Dull red and cream colored skin. Mid-July in Central CA. 650 hours. Self-fruitful. (Zaiger)

Arctic Babe Miniature Interspecific Nectarine A result of innovative interspecific breeding by Zaiger Genetics, Arctic Babe is the first white-fleshed miniature nectarine. Super-sweet, large size fruit ripens early: late May to early June in central California. Reaching only 4-6 ft., this tree is easy to thin and harvest, easy to cover to protect blooms from frost. Chilling requirement not yet established, expected to be less than 700 hours. Self-fruitful. (Introduced for the 2017-18 season as 243BC331 Miniature Interspecific Nectarine)

Arctic Supreme White Peach Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central CA. 700 hours. Self-fruitful. (Zaiger)

Babcock White Peach Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. High scoring in taste tests. Ripens mid-July in Central CA. Widely adapted (low chill requirement, yet not early blooming). 250-300 hours. Self-fruitful.

Fairtime Peach Fine fruit for the very late season. Very large yellow freestone with excellent flavor. Mid-September in Central CA. Early bloom. 4-500 hours. Self-fruitful.

Fay Elberta Peach Popular yellow freestone: juicy, moderately sweet, flavorful. Fresh/can/freeze/dry. Ripens 1-2 days later than Elberta in Central CA. (August 1st), but blooms earlier. 700 hours. Self-fruitful.

Fortyniner Peach Large yellow freestone, similar to its parent J.H. Hale. Excellent dessert quality. Ripens late July in Central CA, one week before Fay Elberta. 700 hours. Self-fruitful.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Frost Peach Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July ripening. Showy pink bloom in spring. 700 hours. Self-fruitful.

Indian Blood Cling Peach Large, late season canning peach. Red skin, red flesh, rich flavor. Blooms late, sets heavy crops. 800 hours. Self-fruitful.

July (Kim) Elberta Peach Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400-500 hours. Self-fruitful.

Kaweah Peach A favored late summer peach at Dave Wilson Nursery for providing consistent high yields and large size fruit. Kaweah has a delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. Recent low-chill trials have shown Kaweah to be productive with less than 500 chill hours. (Pat. No. 10177) (Zaiger)

O'Henry Peach Popular fresh market yellow freestone and an excellent choice for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in Central CA. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

Redhaven Peach Long one of the world's most widely planted peaches. High quality yellow freestone. Ripens early July in Central CA. Frost hardy, excellent producer. Fresh/freeze. 800 hours. Self-fruitful.

Rio Oso Gem Peach Favorite late yellow freestone. Large, sweet, rich flavor, like J.H. Hale. Fresh/freeze. Small tree. Showy bloom. Mid-August in Central CA. 800 hours. Self-fruitful.

Suncrest Peach Large, very firm, fine-flavored, yellow freestone. Bright red skin over yellow. Suncrest is the peach immortalized by the book *Epitaph for a Peach: Four Seasons on My Family Farm*, by David Mas Masumoto (1995). Harvest late July in Central CA. Frost hardy blossoms, consistent producer. Originated in Fresno, CA. Introduced in 1959. 500 hours. Self-fruitful.

Sauzee Swirl White Peach For white peach lovers! Sauzee Swirl is a new saucer ("donut") style peach from Zaiger Genetics. Beautiful white flesh with red marbling and a pronounced flavor that keeps you wanting more. Medium sized clingstone fruit harvests in mid to late May in central California, a full month before Stark Saturn. The ripe fruit is distinctively ornamental hanging in the tree, and beautiful when served cut open. Estimated chill requirement 400 hours. Self-fruitful. Patent Pending. (Zaiger)

Bartlett Pear World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis.

Bosc Pear Long and narrow shape, brown skin. Superb quality, one of the best. Harvest late October. Use fresh or cooked. Susceptible to fire blight in warm, moist climates. 500-600 hours. Pollenized by Bartlett or other pear.

Comice Pear The famous gift pack pear. Sweet, aromatic, fine texture, superb flavor and quality - one of the best. Short neck, greenish-yellow skin with red blush. Late harvest. 600 hours. Self-fruitful in most climates of Western U.S. or plant with Bartlett.

D'Anjou Pear Large, short necked, firm, good quality, keeps well. Harvest September 1st, one month after Bartlett in Central CA. 800 hours. Pollenized by Bartlett.

Multi-Bud Pear Asian, Hosui-Shinseiki-20thCent-Chojuro Hosui, Shinseiki, 20th Century and Chojuro budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Multi-Bud Pear Disease-Resist., Warren-Kieffer-HarrowD-BIPr Warren, Kieffer, Harrow Delight and Blake's Pride budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Warren Pear Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20 deg F. From Mississippi. 600 hours. Self-fruitful

Chocolate Persimmon Small to medium size, oblong, bright red skin. Sweet, spicy, firm, brown flesh, superb flavor the choice of connoisseurs. Astringent until ripe. 200 hours. Self-fruitful.

Coffeecake Persimmon Unique spicy sweet flavor that instantly evokes images of cinnamon pastry, hot coffee and morning sunshine. Coffeecake ripens about the same time as Chocolate and about three weeks to one month earlier than Fuyu. Coffeecake Persimmon is non-astringent and can be eaten while still firm. Hardy, attractive tree, practically free of pests and disease. Estimated chilling requirement: 200 hours or less. Another persimmon variety required as a pollenizer. Goshu or Chocolate are the best pollenizers for Coffeecake.

Fuyu (Jiro) Persimmon Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

Giant Fuyu Persimmon Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful.

Hachiya Persimmon Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. 200 hours. Self-fruitful.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Izu Persimmon Very sweet, tasty, non-astringent fruit ripens about three weeks before Fuyu. Medium to large size, round shape. Relatively small tree, good choice for backyard persimmon. 100 hours. Self-fruitful.

Sugar Twist Pluerry™ Interspecific Plum Newest in the Zaiger Pluerry™ line of high-flavor interspecific plums (plum + cherry), Sugar Twist is unique in that it harvests a month earlier than Sweet Treat. This hybrid has red skin and yellow flesh with an especially enjoyable flavor: cherry sweet with a plum "twist". Pollenized by Flavor King Pluot®, Emerald Beaut plum and most mid to late blooming varieties of Pluot®, Pluerry™ and Japanese plum. Estimated to require 800 chill hours. Patent Pending. (Zaiger)

Sweet Treat Pluerry™ Interspecific Plum Sweet Treat is the first of its kind, the Pluerry™: a new fruit type from the genius of Floyd Zaiger. This taste-test favorite is a complex interspecific hybrid, predominantly of plum and cherry, combining the sweetness of a cherry with that summer fresh plum zing. Much larger than a cherry, this precocious and prolific variety will hang on the tree for over a month, and the colorful fruit make Sweet Treat a true ornamental. Tested as 46MB583. Harvest late June through July. Estimated chilling requirement 450 hours. Pollenizer required: Burgundy or Santa Rosa plum, or Flavor King Pluot® recommended. Patent Pending (Zaiger)

Burgundy Plum Maroon colored skin and semi-freestone flesh. Sweet, with little or no tartness and a very pleasing, mild flavor. High taste test scores. Prolonged harvest, mid-July to mid-August in Central CA. Very productive tree with narrow, upright habit. 300 hours. Self-fruitful.

Emerald Beaut Plum One of the highest-rated plums in blind fruit tastings at DWN. Light green skin, greenish-yellow to orange freestone flesh. Harvest begins late August in Central CA. Ripe fruit continues to sweeten, becoming exceptionally sweet, but remaining crisp and crunchy. Ripe fruit holds on tree longer than any other stone fruit: two months or more! 600-700 hours. Pollenizer required: Beauty, Burgundy, Late Santa Rosa, Nubiana, Flavor King Pluot. (Pat. No. 9162) (Zaiger)

Laroda Plum Very high scores for flavor and overall appeal in Dave Wilson Nursery taste tests. Dark purple skinned fruit with juicy, richly-flavored red and amber flesh. Prolonged harvest: late July to late August in Central CA, 5-6 weeks after Santa Rosa. 400 hrs. Pollenizer required: Santa Rosa, Late Santa Rosa, Burgundy, Nubiana.

Mariposa Plum Large, red fleshed, sweet, juicy, firm, delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Harvest August. 250 hours. Pollenized by Catalina, Nubiana, or Santa Rosa.

Santa Rosa Plum Most popular plum in California & Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

Shiro Plum Medium size greenish-yellow fruit is juicy and moderately sweet with a pleasing mild flavor. Bears reliably in many climates, including Western Oregon and California's northern coast. Late June/early July in Central CA. 400-500 hours. Self-fruitful.

Weeping Santa Rosa Semi-Dwarf Plum One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit: long slender limbs bow gracefully to the ground. Easily espaliered. 200-400 hours. Self-fruitful.

Dapple Dandy Pluot® Interspecific Plum Taste test winner. Ranks with Flavor King Pluot® among the all-time top five best flavored fruits at Dave Wilson Nursery tastings. Creamy white and red fleshed freestone with wonderful plum-apricot flavor. Skin greenish-yellow with red spots, turning to a maroon and yellow dapple. August harvest in Central CA. 400-500 hours. Pollenized by Flavor Supreme Pluot®, Flavor King Pluot®, Santa Rosa, Catalina or Burgundy Plum. (Pat. No. 9254) (Zaiger)

Flavor Grenade Pluot® Interspecific Plum Elongated green fruit with red blush. Crisp texture, explosive flavor. Taste test winner. Hangs on the tree for 4-6 weeks. Pollenized by Flavor King Pluot®, Dapple Dandy Pluot®, Emerald Drop Pluot® or Santa Rosa plum. 300-400 hours. (Pat. No. 12097) (Zaiger)

Flavor King Pluot® Interspecific Plum Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central CA. Naturally small tree. 400 hours or less. Pollenized by Flavor Supreme Pluot® or Dapple Dandy Pluot® and Santa Rosa or Late Santa Rosa plum. (Zaiger)

Flavor Queen Pluot® Interspecific Plum Exquisite plum/apricot hybrid with candy-like sweet, wonderfully pleasing flavor. Greenish-yellow skin, amber-orange flesh. Prolonged harvest: mid-July thru August at Hickman, CA. 400-500 hours. Pollenized by Dapple Dandy Pluot® or Flavor Supreme Pluot® or by a Japanese plum such as Burgundy. Not pollenized by Flavor King Pluot®. (Zaiger)

Flavor Supreme Pluot® Interspecific Plum Taste test winner. Plum/apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central CA, about two weeks before Santa Rosa. 700-800 hours. Pollenized by Santa Rosa and Late Santa Rosa plums, or Flavorosa, Flavor Queen and Geo Pride Pluot®. (Zaiger)

Multi-Bud Pluot® I.S. Plum, FI King-FI Queen-FI Supr-DapDan Flavor King, Flavor Queen, Flavor Supreme and Dapple Dandy budded onto Citation rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Splash Pluot® Interspecific Plum Small to medium-sized red-orange colored fruit, with very sweet orange flesh. Consistently among the highest scoring varieties at Dave Wilson formal fruit tastings. Round to heart-shaped fruit is excellent eaten fresh, dried or in desserts. Upright tree sets large crops once established. 400 hours or less. Pollenized by Santa Rosa plum or Flavor Grenade Pluot®. (Pat No. 14583) (Zaiger).

Ambrosia Pomegranate Medium to large, pale pink skin, purple sweet-tart juice, similar to Wonderful. Long-lived, inland or coastal climate. 150 hours. Self-fruitful.

Cranberry Pomegranate Medium sized fruit, cranberry red exterior. Light to deep red arils, small seed. Mild acidity, flavor rated as very good. Developed by University of California. Fruit ripe October-November. Chill requirement 150 hours, self-fruitful.

Eversweet Pomegranate Very sweet, virtually seedless fruit. (Even immature fruits are sweet.) Red skin, clear (non-staining) juice. Harvest late summer through fall. Coast or inland. 8-10 ft. arching shrub, or train as tree or espalier. Large, showy, orange-red flowers. 150 hours. Self-fruitful.

Parfianka Pomegranate Large size red fruit is sweet with a hint of acidity. Arils are red with very small edible seeds. Vigorous upright plant sets a heavy crop dependably. Maintain at any height with summer pruning. Consistently receives the highest praise for overall flavor. Great for juice or fresh eating. A Dr. Gregory Levin introduction through U.C. Davis. Very highly rated in U.C. Davis taste tests. Some rate Parfianka as the best tasting pomegranate. Required chill hours 100-200. Self-fruitful, best in zones 7-10.

Sweet Pomegranate Sweeter fruit than Wonderful, more widely adapted (better quality in cool-summer climates). Small, glossy-leaved, ornamental tree with showy orange-red blossoms in late spring. Very suitable to espalier and container growing. Harvest late summer. Unsplit ripe fruit stores in cool, dry place for two months or more. Very low chilling requirement, about 100 hours. Self-fruitful.

French Improved Prune California's commercial prune. Reddish purple skin, dark amber flesh. Very sweet, high quality fruit dessert/can/dry. 800 hours. Self-fruitful.

Italian Prune Large, purple skin, freestone. Rich flavor, very sweet when fully ripe. Fresh/dried/canned. Vigorous, cold hardy tree. Late bloom. Late summer harvest. 800 hours. Self-fruitful.

Sugar Prune Reddish purple skin, greenish yellow flesh, very sweet. Used fresh and for canning. Lower chilling requirement than other European prune/plums. 550 hours. Self-fruitful.

Jubilee Southern Highbush Blueberry Southern Highbush. Midseason, sweet, firm berry. Upright and quite compact bush, with fruit borne on the outer periphery. Chilling requirement is estimated at 400-500 hours.

Legacy Northern Highbush Blueberry A USDA introduction from the blueberry research station in New Jersey. Vigorous grower producing medium to large size berries late in the season. Uniquely robust sweet flavor, highly rated in USDA trials. Zones 4-8. Estimated at 800 chill hours. Self-fruitful.

Misty Southern Highbush Blueberry Southern Highbush. Early season. In the West Misty is quite vigorous, growing very well on the coast and in the inland heat. This especially flavorful fruit does well in areas with chilling as low as 150 hours and all areas with mild winters and hot summers.

O'Neal Southern Highbush Blueberry Southern Highbush. Large fruit is especially sweet and flavorful. Early season. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

Pink Lemonade Northern Highbush Blueberry Pink Lemonade offers something unique in edible fruits. White translucent berries mature to a luscious bright pink and taste wonderfully sweet with a firm, clear texture. 'Pink Lemonade' will produce farther south than many traditional blueberry cultivars. Berry color and flavor will attract both gourmet cooks and those seeking a culinary novelty. However, it is the beauty of the plant that will earn respect of gardeners everywhere.

Southmoon Southern Highbush Blueberry Southern highbush. Exceptional berries with superb flavor. Florida native with vigorous, upright character. Performs well in California, both inland and coastal. Prefers light sandy soils. 200-300 hours. (Pat No. 9834)

Fall Gold Raspberry Everbearing - Hybrid of Taylor X wild Korean mountain berry X Fall Red. Large to very large golden berries of excellent flavor. Extremely sweet and soft textured. Very adaptable and winter hardy. Harvest June through fall. Self-fruitful. Best in zones 4-11.

Heritage Raspberry Everbearing - Large, sweet, dark red berries. Mild flavor and excellent quality. Good for all uses. Moderate early crop in June, July. Heavier late crop August through fall. Berries keep well on or off the vine. Upright growth habit. Self-fruitful. Best in Zones 4-11.

Jewell Black Raspberry Produces compact clusters of large to very large fruit. Rich raspberry flavor. Very high quality, good for pies, preserves and fresh use. May-June harvest. Vigorous, hardy vines are the most disease resistant of all black raspberries. Upright habit, no support required. Self-fruitful. Best in zones 4-11.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Marion Blackberry Medium to large size firm, sweet, bright berries. Excellent for fresh and dessert use. Rated by many as the best pie berry. Long harvest June through summer. Cross of Olallieberry developed in Oregon where it is a major commercial variety. Very long, vine-like canes require support. Self-fruitful. Best in zones 6 - 9

Nova Red Raspberry Medium size dark red fruit. Mild flavor. Firm when ripe and very suited for U-pick, fresh market and freezing. Bears early May, June. Disease resistant, very cold hardy. Very few thorns. Self-fruitful. Best in zones 3 - 9, but also has done well in zones 10 and 11.

Olallieberry A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.

Willamette Red Raspberry Large to very large, long-conic berries. Very firm and deep red. Lower sugar content, slightly tart flavor. Good for all uses. Berries hold and store well. Main harvest June, July. Some support required. Self-fruitful. Best in Zones 5-10.

Goji Berry Bright red fruit used either fresh or dried. Contains the highest antioxidant level of any fruit type. Drought tolerant once established and very cold hardy. Self-fertile. USDA zone 5-9.

Black Monukka Seedless Grape Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Use fresh or for raisins. Early midseason. 100 hours. Self-fruitful. Cane or spur prune.

Concord (Eastern) Grape Versatile, long-time favorite American grape. Blue-black berry with rich, distinctive flavor, used for table, juice, jelly and wine. 100 hours. Self-fruitful. Cane prune.

Crimson Seedless Grape Newer late season seedless grape, ripens early October in Fresno, CA. Medium size, firm, very sweet, excellent quality. Cane prune. 100 hours. Self-fruitful.

Flame Seedless Grape Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens before Thompson. Vigorous. 100 hours. Self-fruitful. Cane or spur prune.

Golden Muscat Grape American/European hybrid. Large, eggshaped berries are pale golden yellow when ripe. Characteristic European muscat flavor and aroma. 100 hours. Self-fruitful. Spur prune.

Ruby Seedless Grape Dark red, sweet, crisp, excellent fresh or for raisins. Ripens after Thompson Seedless. Requires less summer heat than Thompson or Flame. 100 hours. Self-fruitful. Cane or spur prune.

Thompson Seedless Grape Most popular grape in CA, AZ. Fresh and raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful. Cane prune.

All-in-One Genetic Semi-Dwarf Almond No. 1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter and frost hardy. 300-400 hrs. Self-fruitful. (Zaiger)

Kerman Female Pistachio Long hot summers required to ripen. Plant from containers only, do not disturb root ball when handling. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollenized by Peters.

Peters Male Pistachio Pollenizer for Kerman. Does not bear fruit. One Peters pollenizes up to eleven females. Plant from containers only. Drought-resistant once established. 800 hours.

Chandler Walnut Developed by U.C. Davis. Heavy bearing (bears on lateral buds, not just terminals like Hartley). High quality light-colored nuts. Smaller tree than Hartley, good choice for backyard walnut. Fall harvest. 700 hours. Self-fruitful.

Lombardy Poplar *Populus nigra* 'Italica' Rapid growth to 40-100 ft. Columnar form, used for quick screen or wind break. Yellow fall color. Shimmering leaves are especially distinctive, ornamental. Invasive roots. All zones.
