## Dave Wilson Nursery varieties for 2019:

**Braeburn Apple** New, from New Zealand. Superb late season fruit: very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours. Self-fruitful. USDA Zones 5-10.

**Fuji Apple** Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

**Gala Apple** Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollinizer for other varieties. Adapted to cold- and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4-10.

**Granny Smith Apple** From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6-9.

**Honeycrisp Apple** Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens mid-August. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3-8.

**McIntosh Apple** Round, bright to dark red over green, superb quality in cool climates. Crisp, aromatic, subacid & sweet. Dessert/cooking. Early harvest. 900 hours. Partly self-fruitful, or pollenized by Red Delicious, Gala, or other. USDA Zones 4-7.

**Multi-Bud Apple, Fuji-Gala-Golden Delicious-Granny Smith** Fuji, Gala, Golden Delicious and Granny Smith budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

**Multi-Bud Apple, Fuji-Gala-Mutsu-Jonagold** Fuji, Gala, Mutsu and Jonagold budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

**Mutsu Apple** A favorite of connoisseurs: very large, crisp and flavorful. Late September/October harvest.

Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 500 hours. Pollenizer required: Red Delicious, Granny Smith, Fuji, Gala. USDA Zones 4-8.

**Pink Lady® Apple** Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 300-400 hours. USDA Zones 6-9.

**Red Delicious (Bisbee Spur) Apple** Sweet, crisp, flavorful perhaps the best Red Delicious. Early fall. Small, compact tree. Good pollinizer for most other apples. 700 hours. Pollenized by Liberty, Granny Smith, Golden Delicious, Fuji, Gala. USDA Zones 4-7.

**Blenheim (Royal) Apricot** All-purpose freestone. Sweet, aromatic, flavorful - the long-time No. 1 apricot in California. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7-8.

**Earli-Autumn Apricot** Wonderful flavor as tested by Dave Wilson Nursery both fresh and dried. Will please even the most critical of apricot lovers. Late harvest, first two weeks of August. 500 hours or less. Self-fruitful. (Pat. No. 9937). USDA Zones 7-9. (Zaiger)

**Gold Kist Apricot** Excellent backyard apricot for warm winter climates. Freestone, very good quality. Heavy bearing. Early harvest, 3-4 weeks before Blenheim (Royal). 300 hours. Self-fruitful. USDA Zones 7-9. (Zaiger)

**Multi-Bud Apricot, Tomcot-Katy-Blenh-Flvr Delight-Ryl Rosa** Tomcot, Katy, Blenheim, Flavor Delight Aprium? and Royal Rosa budded onto Citation rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

**Pixie-Cot Genetic Semi-dwarf Apricot** Compact tree with medium-sized, fine quality fruit. First genetically dwarfed apricot to meet the flavor standards set by Dave Wilson Nursery for release to the home gardener. Ripens first week of June in CA's Central Valley. 500 hours. Patent pending. (Zaiger)

**Tomcot Apricot** A consistently productive apricot variety. Large, orange fruit with firm, sweet flesh. Slightly tart, old-time apricot flavor. Early harvest, 2 - 3 weeks before Wenatchee Moorpark. Originated at Prosser, WA, introduced in 1989. 500 hours or less. Partly self-fruitful, largest crops if cross-pollenized by another apricot. USDA Zones 4-8.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Cot-N-Candy White Aprium® Interspecific**

**Apricot** Wonderful new fruit from Zaiger Hybrids. White flesh apricot-plum hybrid. Medium-sized with incredible flavor, very sweet and juicy. Ripens early- to mid-July. Self-fruitful. 400 hours or less. USDA Zones 7-10. (Pat. No. 17827) (Zaiger)

**Flavor Delight Aprium® Interspecific Apricot** Apricot-plum hybrid. Resembles an apricot but with a distinctive flavor and texture all its own. High taste-test scores, one of the most flavorful early season fruits. Early June. Very low chilling requirement, less than 300 hours. Self-fruitful, but largest crops when pollenized by another apricot. (Zaiger)

**Leah Cot Aprium® Interspecific Apricot** Large size Aprium® with deep orange color inside and out. Reliable annual bearer, high flavor and firm texture, ripens mid to late June in Central California, just after Flavor Delight Aprium®. Self-fruitful, required chill 500 hours or less, best in zones 7-10. U.S. Plant Patent No. 21863 (Zaiger)

**Summer Delight Aprium® Interspecific Apricot** New introduction for 2016. This late-season Aprium® is a reliable bearer with very juicy flesh and great apricot flavor. Ripens late July-early August at Hickman, California. Self-fruitful, chilling requirement 500 hours or less. Best in zones 7-10. U.S. Plant patent pending (Zaiger)

**20th Century Asian Pear** Juicy, sweet, mild flavored fruit is crisp like an apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollenized. by Shinseiki, Bartlett, or other.

**Bing Cherry** Large, firm, juicy, sweet, nearly black when ripe. Superb flavor, the No. 1 cherry. Midseason. Large vigorous tree. Pollenized by Black Tart, Van, Rainier and Lapins. Also Stella in colder climates. 700 hours. USDA Zones 5-9.

**Black Tartarian Cherry** Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries. USDA Zones 5-7.

**Craig's Crimson Cherry** Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Harvest begins early. 500-600 hours. USDA Zones 5-9. (Zaiger)

**English Morello Sour Cherry** Late-ripening tart cherry for cooking, sometimes eaten fresh when fully ripe. Dark red to nearly black fruit with dark juice. Small, round-headed tree with drooping branches (easy to harvest). European origins obscure, introduced to America prior to 1862. 500 hours or less. Self-fruitful. USDA Zones 4-9.

**Lapins Cherry** Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

**Multi-Bud Cherry, Rainier-Bing-Lapins-Van** Rainier, Bing, Lapins and Van budded onto Mazzard rootstock. Finished trees are 4n1's plus assorted 3n1's and 2n1's.

**Royal Crimson Cherry** The long-awaited low-chill self-fruitful sweet cherry from Zaiger Genetics, Royal Crimson is a consistent producer of large, tasty, crimson-red fruit. Harvest is early to mid May. This important new variety is also an excellent pollenizer for Minnie Royal and Royal Lee. Estimated chill requirement 200-300 hours. Patent applied for. (Zaiger)

**Royal Rainier Cherry** Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Ripens early, about 3-5 days ahead of Rainier. Chill requirement 500 hours. Pollenized by Bing, Black Tartarian and Lapins. USDA Zones 5-9. (Zaiger)

**Stella Cherry** Self-fruitful - no pollenizer needed. Large, nearly black, richly flavored sweet cherry similar to its parent, Lambert. Late harvest. 400 hours. Pollinates Bing, except in mild winter climates. USDA Zones 5-9.

**Sweetheart™ Cherry** Van x Newstar. Large, bright red fruit with good flavor. Precocious tree requires pruning to prevent size problems. Self-fertile. Matures 5-7 days after Lapins. Developed in Summerland, British Columbia.

**Utah Giant Cherry** The industry favorite sweet cherry in Utah. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollenizer required: Bing, Lambert, Rainier, Van. USDA Zones 5-9.

**Green Gage (Bavay's) European Plum** Superior selection of gage-type European plum. Small to medium-sized, richly flavored & very sweet. Excellent fresh and for cooking. More productive in moderate winter climates than common Green Gage. Originated in Belgium in 19th century. Estimated winter chilling requirement 700 hours. Self-fruitful.

**Black Mission Fig** The industry standard. Purplish-black skin, strawberry-colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Two crops per year. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

**Improved Brown Turkey Fig** Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted - coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful. USDA Zones 7-9.

**Kadota Fig** Large, light greenish-yellow 'white' skin, amber flesh. Long-lived, vigorous. Prune to any shape. Very sweet fruit needs hot weather to ripen. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Panache Fig** Especially fine flavor! Small to medium-sized fruit with green color and yellow Tiger stripes. Strawberry pulp is blood-red in color. 100 hours. Self-fruitful.

**Peter's Honey Fig** Beautiful, shiny fruit, greenish-yellow when ripe. Very sweet, dark, amber flesh. High quality. Superb for fresh eating. Warm location with a southern exposure is required for ripening fruit in maritime Northwest. Originated in Sicily. Good cold tolerance. Self-fruitful. USDA Zones 6-10.

**Violette de Bordeaux Fig** Small to medium size purple-black fruit with a very deep red strawberry pulp and distinctive, sweet, rich flavor. Brebas are pear-shaped with a thick, tapering neck, main crop figs are variable, often without neck. Medium eye. Excellent fresh or dried. Good for container culture or small spaces. Hardy. Self-fruitful. USDA Zones 5-10.

**Multi-Bud Fruit Salad, JuElb-Fantasia-Babcock-SRosa-Blenh** July Elberta Peach, Fantasia Nectarine, Babcock White Peach, Santa Rosa Plum and Blenheim Apricot budded onto Nemaguard rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

**Multi-Bud Peach-Nect Showy Flowers, F-S-RB-MP-DD** Fantasia Nectarine, Saturn Peach, Red Baron Peach, Mid-Pride Peach and Double Delight Nectarine budded onto Nemaguard rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

**Multi-Bud Peach-Nect White Flesh, HW-AS-WL-B-AR** Heavenly White Nectarine, Arctic Supreme White Peach, White Lady White Peach, Babcock White Peach and Arctic Rose White Nectarine budded onto Lovell rootstock. Finished trees 5n1s + assorted 4n1s, 3n1's.

**Lang Jujube** Pear-shaped fruits are reddish-brown, dry, wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy to grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Pollenized by Li or other jujubes. USDA Zones 5-10.

**Li Jujube** Round shaped fruits are larger than Lang. Reddish brown, dry and wrinkled, sweet and chewy (like dates) when fully ripe in early Fall. Attractive, easy to grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Very low chilling requirement. Self-fruitful. USDA Zones 5-10.

**Pakistan Fruiting Mulberry** *Morus alba* 'Pakistan' Long (3 inches), firm, red to black, sweet fruit. Non-staining juice. Month-long early summer harvest. Fruit used fresh and for pies, jams and jellies. Large, vigorous, disease-resistant tree.

**Persian Fruiting Mulberry** *Morus nigra* 'Persian' Densely foliated tree to 25-30 ft. Large heart-shaped leaves. Large fruit is juicy, dark red to black and good for jam. USDA Zones 7-9.

**Spice Zee NectaPlum® Interspecific Nectarine** The first NectaPlum® from Zaiger Genetics: a white-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable. Tree is quite ornamental. Tremendous purplish pink bloom in the spring, followed by a flourish of red leaves which mature into lush green in late summer. Self-fruitful. Very productive. 200-300 hours. High chill adaptable. (Pat. No. 13503) (Zaiger)

**Arctic Jay White Nectarine** Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of acid and sugar. Ripens between Arctic Glo and Heavenly White white nectarines. 500 hours or less. Self-fruitful. (Pat. No. 9908) (Zaiger)

**Arctic Rose White Nectarine** Delicious, super-sweet, white nectarine. Very high scoring in taste tests. Rich flavor and nice crunchy texture when firm ripe, extremely sweet when fully ripe. Harvest mid to late July in Central CA. Highly recommended for home orchards. 600-700 hours. Self-fruitful. (Zaiger)

**Double Delight Nectarine** Sensational fruit: consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red-skinned, freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

**Fantasia Nectarine** Popular, large yellow freestone. Early harvest fruit is firm ripe and tangy, later harvest is sweet with rich flavor: high scoring in taste tests. Late July/early August in Central CA. 500 hours or less. Self-fruitful.

**Flavortop Nectarine** Large, firm, yellow freestone of excellent quality. One of the highest scoring nectarines in DWN fruit tastings. One of the very best! Ripe mid-July in Central CA, between Independence and Fantasia. Large showy blossoms. 650 hours. Self-fruitful.

**Garden Delight Miniature Nectarine** Large yellow freestone is sweet, delicious, refreshing. Mid-August in Central CA. Heavy bearing 5-6 ft. tree, easily covered to protect from frost. 500 hours or less. Self-fruitful. (Zaiger)

**Harko Nectarine** One of the highest scoring nectarines in DWN fruit tastings. Cold hardy Canadian variety has showy, large, single pink blossoms. Ripens with Redhaven Peach in early July in Central CA. Tolerant of bacterial spot and brown rot. 800 hours. Self-fruitful.

**Heavenly White - White Nectarine** One of the highest-scoring fruits in Dave Wilson Nursery taste tests. Very large, firm, white-fleshed freestone. Superb acid/sugar balance and rich, complex flavor, a connoisseur's delight. Dull red and cream colored skin. Mid-July in Central CA. 650 hours. Self-fruitful. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Necta Zee Miniature Nectarine** Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less. Self-fruitful. (Zaiger)

**Sauzee King Nectarine** First 'donut' style nectarine from Zaiger Hybrids. Outstanding early season variety has white flesh that is sweet and juicy. Red skin, blushed with yellow. Tree sets fruit at a young age and produces heavily. Thinning is required for large fruit size. Estimated chilling requirement 500 hours or less. (Pat. No. 16258) (Zaiger)

**Arctic Babe Miniature Interspecific Nectarine** A result of innovative interspecific breeding by Zaiger Genetics, Arctic Babe is the first white-fleshed miniature nectarine. Super-sweet, large size fruit ripens early: late May to early June in central California. Reaching only 4-6 ft., this tree is easy to thin and harvest, easy to cover to protect blooms from frost. Chilling requirement not yet established, expected to be less than 700 hours. Self-fruitful. (Introduced for the 2017-18 season as 243BC331 Miniature Interspecific Nectarine)

**Arctic Supreme White Peach** Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central CA. 700 hours. Self-fruitful. (Zaiger)

**Babcock White Peach** Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. High scoring in taste tests. Ripens mid-July in Central CA. Widely adapted (low chill requirement, yet not early blooming). 250-300 hours. Self-fruitful.

**Carnival Peach** Very late season yellow freestone. Large red-skinned fruit ripens late September/early October in Central CA. Vigorous, productive tree. Estimated chilling requirement 500 hours or less. Self-fruitful.

**Donut (Stark Saturn) White Peach** Unique white-fleshed fruit with a sunken center (shaped like a doughnut). Sweet, with a mild flavor described by some as almond-like. Ripens late June/early July in Central CA. Est. chilling requirement 200-300 hours. Self-fruitful.

**Elberta Peach** Famous yellow freestone. Classic, rich peach flavor: high scoring in taste tests. Use fresh, canned or cooked. Ripe late July/early August in Central CA, up to 3-4 weeks later in colder climates. 600 hours. Self-fruitful.

**Frost Peach** Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July ripening. Showy pink bloom in spring. 700 hours. Self-fruitful.

**Gold Dust Peach** Best early season yellow peach: very high scores for flavor and overall appeal in Dave Wilson Nursery blind taste tests. Semi-freestone ripens mid to late June in Central CA, 2-3 weeks ahead of Redhaven. All purpose, superb for eating fresh. Not an early bloomer. 550 hours. Self-fruitful.

**Halford Cling Peach** Large yellow canning cling, the leading commercial variety. Very good quality. Productive. Early September in Central CA. 800 hours. Self-fruitful.

**Honey Babe Miniature Peach** Sweet, yellow freestone, rich peach flavor. Heavy bearing 5 ft. tree. Early to mid-July in Central California. Excellent choice for home orchard. 400 hours or less. Partly self-fruitful, sometimes shy-bearing without a pollinizer. (Zaiger)

**Indian Free White Peach** The all-time highest rated peach at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinize.

**July (Kim) Elberta Peach** Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400-500 hours. Self-fruitful.

**June Pride Peach** Intensely flavored, highly colored yellow freestone. Perhaps the best flavored peach for its season July 1st in Central CA. Excellent early peach for home orchards. 500 hours. Self-fruitful. (Zaiger)

**Kaweah Peach** A favored late summer peach at Dave Wilson Nursery for providing consistent high yields and large size fruit. Kaweah has a delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. Recent low-chill trials have shown Kaweah to be productive with less than 500 chill hours. (Pat. No. 10177) (Zaiger)

**May Pride Peach** Very early peach for warm winter climates. Ripens in May, about with Desert Gold. Delicious, sweet and tangy, semi-freestone when fully ripe. Very large for such an early peach. Large, showy pink blossoms. 150-200 hours. Self-fruitful. (Zaiger)

**O'Henry Peach** Popular fresh market yellow freestone and an excellent choice for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in Central CA. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

**Pix Zee Miniature Peach** Large fruit ripens mid to late June in Central CA, two weeks before Honey Babe. Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. 400 hours or less. Self-fruitful. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Snow Beauty White Peach** Taste test winner: one of the all-time highest-scoring varieties in blind fruit tastings at Dave Wilson Nursery. Low acid, high sugar, tantalizing flavor. Large, very firm, attractive red skin. Harvest early to mid-July in Central CA. Estimated chilling requirement 750-850 hours. Self-fruitful. (Pat. No. 10175) (Zaiger)

**Suncrest Peach** Large, very firm, fine-flavored, yellow freestone. Bright red skin over yellow. Suncrest is the peach immortalized by the book Epitaph for a Peach: Four Seasons on My Family Farm, by David Mas Masumoto (1995). Harvest late July in Central CA. Frost hardy blossoms, consistent producer. Originated in Fresno, CA. Introduced in 1959. 500 hours. Self-fruitful.

**Sweet Bagel Peach** Flat 'donut' shaped peach with yellow flesh and classic peach flavor. Tree sets heavy crops of large fruit in Central California. Moderate chill requirement, 300-400 hours. Self-fruitful.

**White Lady White Peach** Among the best of the low acid/high sugar white peaches - a farmer's market favorite. Red-skinned fruits are medium to large, very firm, freestone. Introduced in 1986. 800 hours. Self-fruitful. (Zaiger)

**Sauzee Swirl White Peach** For white peach lovers! Sauzee Swirl is a new saucer ("donut") style peach from Zaiger Genetics. Beautiful white flesh with red marbling and a pronounced flavor that keeps you wanting more. Medium sized clingstone fruit harvests in mid to late May in central California, a full month before Stark Saturn. The ripe fruit is distinctively ornamental hanging in the tree, and beautiful when served cut open. Estimated chill requirement 400 hours. Self-fruitful. Patent Pending. (Zaiger)

**Bartlett Pear** World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis.

**Comice Pear** The famous gift pack pear. Sweet, aromatic, fine texture, superb flavor and quality - one of the best. Short neck, greenish-yellow skin with red blush. Late harvest. 600 hours. Self-fruitful in most climates of Western U.S. or plant with Bartlett.

**D'Anjou Pear** Large, short necked, firm, good quality, keeps well. Harvest September 1st, one month after Bartlett in Central CA. 800 hours. Pollenized by Bartlett.

**Kieffer Pear** Medium to large late season fruit for canning and cooking. Sprightly flavor, coarse texture. Resists fire blight, tolerates hot climates. Dependable crops. 200-300 hours. Self-fruitful.

**Multi-Bud Pear Asian, Hosui-Shinseiki-20thCent-Chojuro** Hosui, Shinseiki, 20th Century and Chojuro budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

**Multi-Bud Pear Disease-Resist., Warren-Kieffer-HarrwD-BIPr** Warren, Kieffer, Harrow Delight and Blake's Pride budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

**Warren Pear** Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20 deg F. From Mississippi. 600 hours. Self-fruitful

**Chocolate Persimmon** Small to medium size, oblong, bright red skin. Sweet, spicy, firm, brown flesh, superb flavor the choice of connoisseurs. Astringent until ripe. 200 hours. Self-fruitful.

**Coffeecake Persimmon** Unique spicy sweet flavor that instantly evokes images of cinnamon pastry, hot coffee and morning sunshine. Coffeecake ripens about the same time as Chocolate and about three weeks to one month earlier than Fuyu. Coffeecake Persimmon is non-astringent and can be eaten while still firm. Hardy, attractive tree, practically free of pests and disease. Estimated chilling requirement: 200 hours or less. Another persimmon variety required as a pollinizer. Goshu or Chocolate are the best pollinizers for Coffeecake.

**Fuyu (Jiro) Persimmon** Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

**Giant Fuyu Persimmon** Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful.

**Hachiya Persimmon** Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. 200 hours. Self-fruitful.

**Candy Heart Pluerry™ Interspecific Plum** - New for 2016 - Candy Heart, having Japanese plum and sweet cherry in its parentage, is a taste-test proven treat for fruit lovers. Its skin is dark speckled red, the amber/red flesh slightly subacid and very sweet, with a wonderfully unique flavor. This variety has an extended hang time, reaching peak ripeness around mid August in Central California. Pollenized by Sweet Treat Pluerry™ and Burgundy plum. (U.S. Plant Patent Pending) (Zaiger)

**Sugar Twist Pluerry™ Interspecific Plum** Newest in the Zaiger Pluerry™ line of high-flavor interspecific plums (plum + cherry), Sugar Twist is unique in that it harvests a month earlier than Sweet Treat. This hybrid has red skin and yellow flesh with an especially enjoyable flavor: cherry sweet with a plum "twist". Pollenized by Flavor King Pluot®, Emerald Beaut plum

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

and most mid to late blooming varieties of Pluot®, Pluerry™ and Japanese plum. Estimated to require 800 chill hours. Patent Pending. (Zaiger)

**Sweet Treat Pluerry™ Interspecific Plum** Sweet Treat is the first of its kind, the Pluerry™: a new fruit type from the genius of Floyd Zaiger. This taste-test favorite is a complex interspecific hybrid, predominantly of plum and cherry, combining the sweetness of a cherry with that summer fresh plum zing. Much larger than a cherry, this precocious and prolific variety will hang on the tree for over a month, and the colorful fruit make Sweet Treat a true ornamental. Tested as 46MB583. Harvest late June through July. Estimated chilling requirement 450 hours. Pollenizer required: Burgundy or Santa Rosa plum, or Flavor King Pluot® recommended. Patent Pending (Zaiger)

**Burgundy Plum** Maroon colored skin and semi-freestone flesh. Sweet, with little or no tartness and a very pleasing, mild flavor. High taste test scores. Prolonged harvest, mid-July to mid-August in Central CA. Very productive tree with narrow, upright habit. 300 hours. Self-fruitful.

**Elephant Heart Plum** Home orchard favorite: large, heart-shaped fruit with sweet, juicy, richly flavored, firm red flesh. Dark reddish-purple mottled skin. Long harvest season - September in Central CA. Hardy, heavy bearing tree. 500 hours or less. Pollenize with Beauty or Santa Rosa.

**Emerald Beaut Plum** One of the highest-rated plums in blind fruit tastings at DWN. Light green skin, greenish-yellow to orange freestone flesh. Harvest begins late August in Central CA. Ripe fruit continues to sweeten, becoming exceptionally sweet, but remaining crisp and crunchy. Ripe fruit holds on tree longer than any other stone fruit: two months or more! 600-700 hours. Pollenizer required: Beauty, Burgundy, Late Santa Rosa, Nubiana, Flavor King Pluot. (Pat. No. 9162) (Zaiger)

**Golden Nectar Plum** Popular yellow dessert plum. Large, oblong fruit with waxy, thin, amber skin. Amber flesh is firm, sweet and flavorful. Very small pit. August harvest in Central CA. 400 hours or less. Self-fruitful.

**Mariposa Plum** Large, red fleshed, sweet, juicy, firm, delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Harvest August. 250 hours. Pollenized by Catalina, Nubiana, or Santa Rosa.

**Santa Rosa Plum** Most popular plum in California & Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

**Satsuma Plum** Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollenized by Santa Rosa or Beauty.

**Weeping Santa Rosa Semi-Dwarf Plum** One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit: long slender limbs bow gracefully to the ground. Easily espaliered. 200-400 hours. Self-fruitful.

**Dapple Dandy Pluot® Interspecific Plum** Taste test winner. Ranks with Flavor King Pluot® among the all-time top five best flavored fruits at Dave Wilson Nursery tastings. Creamy white and red fleshed freestone with wonderful plum-apricot flavor. Skin greenish-yellow with red spots, turning to a maroon and yellow dapple. August harvest in Central CA. 400-500 hours. Pollenized by Flavor Supreme Pluot®, Flavor King Pluot®, Santa Rosa, Catalina or Burgundy Plum. (Pat. No. 9254) (Zaiger)

**Dapple Supreme Pluot® Interspecific Plum** A new low-chill Pluot® for home gardens, Dapple Supreme derives its name from two of the best: Dapple Dandy and Flavor Supreme. With red dappled skin like Dapple Dandy and sweet, dark red flesh like Flavor Supreme, Dapple Supreme is sure to please. Harvest is between Flavor Supreme and Dapple Dandy, mid-July in Central CA. 300 hours. Pollenized by Flavorosa Pluot® or other early blooming plum or Pluot®. (U.S. Plant Patent No. 16412) (Zaiger)

**Flavor Grenade Pluot® Interspecific Plum** Elongated green fruit with red blush. Crisp texture, explosive flavor. Taste test winner. Hangs on the tree for 4-6 weeks. Pollenized by Flavor King Pluot®, Dapple Dandy Pluot®, Emerald Drop Pluot® or Santa Rosa plum. 300-400 hours. (Pat. No. 12097) (Zaiger)

**Flavor King Pluot® Interspecific Plum** Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central CA. Naturally small tree. 400 hours or less. Pollenized by Flavor Supreme Pluot® or Dapple Dandy Pluot® and Santa Rosa or Late Santa Rosa plum. (Zaiger)

**Flavor Queen Pluot® Interspecific Plum** Exquisite plum/apricot hybrid with candy-like sweet, wonderfully pleasing flavor. Greenish-yellow skin, amber-orange flesh. Prolonged harvest: mid-July thru August at Hickman, CA. 400-500 hours. Pollenized by Dapple Dandy Pluot® or Flavor Supreme Pluot® or by a Japanese plum such as Burgundy. Not pollenized by Flavor King Pluot®. (Zaiger)

**Flavor Supreme Pluot® Interspecific Plum** Taste test winner. Plum/apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central CA, about two weeks before Santa Rosa. 700-800 hours. Pollenized by Santa Rosa and Late Santa Rosa plums, or Flavorosa, Flavor Queen and Geo Pride Pluot®. (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Geo Pride Pluot® Interspecific Plum** Red-skinned, yellow flesh plum-apricot hybrid. Balanced acid and sugar to predominantly sweet with unique plum-apricot flavor. Medium-sized, very heavy production. Harvest mid-July to early August, just ahead of Flavor Queen Pluot®. Estimated chilling requirement 400 hours or less. Pollenized by Flavor Supreme Pluot®, Dapple Dandy Pluot®, Santa Rosa plum. Good pollinizer for other plums and Pluot® varieties. (Pat. No. 10386) (Zaiger)

**Multi-Bud Pluot® I.S. Plum Zee Sweet® Nuggets** Splash, Emerald Drop, Flavor Grenade and Geo Pride budded onto Citation rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

**Multi-Bud Pluot® I.S. Plum, FI King-FI Queen-FI Supr-DapDan** Flavor King, Flavor Queen, Flavor Supreme and Dapple Dandy budded onto Citation rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

**Splash Pluot® Interspecific Plum** Small to medium-sized red-orange colored fruit, with very sweet orange flesh. Consistently among the highest scoring varieties at Dave Wilson formal fruit tastings. Round to heart-shaped fruit is excellent eaten fresh, dried or in desserts. Upright tree sets large crops once established. 400 hours or less. Pollenized by Santa Rosa plum or Flavor Grenade Pluot®. (Pat No. 14583) (Zaiger).

**Eversweet Pomegranate** Very sweet, virtually seedless fruit. (Even immature fruits are sweet.) Red skin, clear (non-staining) juice. Harvest late summer through fall. Coast or inland. 8-10 ft. arching shrub, or train as tree or espalier. Large, showy, orange-red flowers. 150 hours. Self fruitful.

**Parfianka Pomegranate** Large size red fruit is sweet with a hint of acidity. Arils are red with very small edible seeds. Vigorous upright plant sets a heavy crop dependably. Maintain at any height with summer pruning. Consistently receives the highest praise for overall flavor. Great for juice or fresh eating. A Dr. Gregory Levin introduction through U.C. Davis. Very highly rated in U.C.Davis taste tests. Some rate Parfianka as the best tasting pomegranate. Required chill hours 100-200. Self-fruitful, best in zones 7-10.

**Sharp Velvet Pomegranate** Large sized pomegranate with a very appealing, unique, mildly acid, refreshing flavor. Fruit has a dark red exterior and dark seeds the color of crushed red velvet. Upright growing plant sets huge crops of highly ornamental fruit and can be kept any height with summer pruning. Eat fresh or use in cooking. An excellent source of antioxidants. Requires 150-200 chill hours. Self-fruitful.

**Wonderful Pomegranate** Large, purple-red fruit with delicious, tangy flavor. Best quality in hot inland climate. Gaudy red orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

**Italian Prune** Large, purple skin, freestone. Rich flavor, very sweet when fully ripe. Fresh/dried/canned. Vigorous, cold hardy tree. Late bloom. Late summer harvest. 800 hours. Self-fruitful.

**Orange Quince** Large, round, bright yellow fruits often exceed one pound. Flavorful, aromatic, excellent for cooking. Early harvest. Old variety, widely planted in Eastern U.S. Cold hardy, yet low chilling requirement: 300 hours. Self-fruitful.

**Pineapple Quince** Heavy crops of large, tart fruit used in baking, jams, and jellies. Profuse, ornamental bloom. Cold hardy, yet low chilling requirement 300 hours. Self-fruitful.

**Misty Southern Highbush Blueberry** Southern Highbush. Early season. In the West Misty is quite vigorous, growing very well on the coast and in the inland heat. This especially flavorful fruit does well in areas with chilling as low as 150 hours and all areas with mild winters and hot summers.

**O'Neal Southern Highbush Blueberry** Southern Highbush. Large fruit is especially sweet and flavorful. Early season. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

**Pink Lemonade Northern Highbush Blueberry** Pink Lemonade offers something unique in edible fruits. White translucent berries mature to a luscious bright pink and taste wonderfully sweet with a firm, clear texture. 'Pink Lemonade' will produce farther south than many traditional blueberry cultivars. Berry color and flavor will attract both gourmet cooks and those seeking a culinary novelty. However, it is the beauty of the plant that will earn respect of gardeners everywhere.

**Reveille Southern Highbush Blueberry** Southern Highbush. Midseason. DWN house favorite. This berry has pleasing crunchy texture and excellent flavor. Chilling hours are listed at 400-500 hours.

**Sharpblue Southern Highbush Blueberry** Southern highbush. Excellent flavor. Nearly evergreen in mild winter climates. Bears fruit nearly year-round. Vigorous plant to 6 ft. Dime-sized dark blue fruit. 200 hours.

**Southmoon Southern Highbush Blueberry** Southern highbush. Exceptional berries with superb flavor. Florida native with vigorous, upright character. Performs well in California, both inland and coastal. Prefers light sandy soils. 200-300 hours. (Pat No. 9834)

**Sunshine Blue Southern Highbush Blueberry** Southern highbush. Great flavored firm berries. Ripens May 10 through June 15 at Gainesville, Florida. Semi-dwarf evergreen bush with great fall color. Showy hot pink flowers fade to white in spring. Self-fruitful. Estimated chilling required 150 hours, but very cold hardy as well.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

**Baba Red Raspberry** Everbearing Red Raspberry - Extra large berries up to 1 1/2" long. Wonderful warm weather variety particularly well suited to southern California's coastal and inland valleys. Fine flavor and good for all uses. Bears heavy crop May-July with a smaller late summer crop through fall. Hardy to zero degrees. Self-fruitful. Best in zones 4-11.

**Black Satin Blackberry** Vigorous, very productive plant. Large berries. Midseason producer, July in most areas. Requires some support due to heavy cropping and limber, semi-trailing plant structure. USDA zones 6-9.

**Boysenberry Thornless** *Rubus ursinus* var. *loganobaccus*, a hybrid of blackberry, raspberry, dewberry and loganberry. Very large berry up to 2.5", dark maroon in color with an intense, tangy, sweet flavor. Excellent quality with few seeds and a pleasant aroma. Vine-like trailing growth habit. Harvest through summer. Self-fruitful, best in zones 5-10.

**Canby Thornless Raspberry** Thornless - the only red thornless raspberry. Large to very large fruit are firm, juicy and of fine flavor. Good for all uses. Viroid and aphid resistant. Very winter hardy, grows best in cooler summer areas. Harvest June, July. Self-fruitful, best in zones 4-9.

**Caroline Raspberry** Summer through fall bearing, red berry with exceptional flavor. Primocane type, produces on new wood. Large yields. More tolerant to phytophthora root rot than Heritage. Best when given afternoon shade. USDA Zones 5-9.

**Fall Gold Raspberry** Everbearing - Hybrid of Taylor X wild Korean mountain berry X Fall Red. Large to very large golden berries of excellent flavor. Extremely sweet and soft textured. Very adaptable and winter hardy. Harvest June through fall. Self-fruitful. Best in zones 4-11.

**Olallieberry** A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.

**Triple Crown Blackberry** Semi-trailing, thornless. Medium to large flavorful berries. Dense foliage prevents sunscald. Vigorous vines to 15' require support. Very productive, reliable harvests. Widely adapted, excellent home garden variety. USDA Zones 5-12.

**Willamette Red Raspberry** Large to very large, long-conic berries. Very firm and deep red. Lower sugar content, slightly tart flavor. Good for all uses. Berries hold and store well. Main harvest June, July. Some support required. Self-fruitful. Best in Zones 5-10.

**Black Monukka Seedless Grape** Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Use fresh or for raisins. Early midseason. 100 hours. Self-fruitful. Cane or spur prune.

**Flame Seedless Grape** Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens before Thompson. Vigorous. 100 hours. Self-fruitful. Cane or spur prune.

**Ruby Seedless Grape** Dark red, sweet, crisp, excellent fresh or for raisins. Ripens after Thompson Seedless. Requires less summer heat than Thompson or Flame. 100 hours. Self-fruitful. Cane or spur prune.

**Issai Hardy Kiwifruit** *Actinidia arguta* 'Issai'. Fuzzless fruit: no need to peel. Smaller than the standard kiwi, often sweeter. Very high in vitamin C. Much more winter hardy than Hayward. New growth tender to frost, but plant recovers quickly. Often sets fruit the first year. 300 hours. Self-fruitful.

**Tomuri Male Kiwi** *Actinidia chinensis*, aka *A. deliciosa*. Pollenizer for Vincent female. Does not bear fruit. One male can pollinize up to eight Vincent females.

**Vincent Female Kiwi** *Actinidia chinensis*, aka *A. deliciosa*. Low chilling requirement, adapted to Southern CA. Tasty, well-regarded fuzzy-skinned fruit. Pollenized by Tomuri Male.

**All-in-One Genetic Semi-Dwarf Almond** No. 1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter and frost hardy. 300-400 hrs. Self-fruitful. (Zaiger)

**Kerman Female Pistachio** Long hot summers required to ripen. Plant from containers only, do not disturb root ball when handling. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollenized by Peters.

**Peters Male Pistachio** Pollenizer for Kerman. Does not bear fruit. One Peters pollenizes up to eleven females. Plant from containers only. Drought-resistant once established. 800 hours.

**Chandler Walnut** Developed by U.C. Davis. Heavy bearing (bears on lateral buds, not just terminals like Hartley). High quality light-colored nuts. Smaller tree than Hartley, good choice for backyard walnut. Fall harvest. 700 hours. Self-fruitful.

**Livermore Red Walnut** The unique red kernal of Livermore Red has attracted quite a following among Farmers Market growers and specialty stores. The growth characteristics are similar to Chandler walnut. This U.C. Davis introduction is self-fruitful and requires 700 chill hours.
